Course Overview

Prerequisite: Beginning with the class of 2006, successful completion of Musicianship or recommendation of an EBHS music teacher

The curriculum of Music Theory Advanced Placement is designed to be equivalent to that which is experienced in the first year of college. This course is for talented and highly motivated students, who have mastered the basic fundamentals of music notation and acquired at least basic performance skill in voice or on an instrument. Through intense practice in aural skills, sight-singing and keyboard harmony, it is designed to prepare these students for the Advanced Placement Exam.

Analytical listening to representative masterworks and the ability to place them in stylistic and historical context (through understanding the materials and processes presented in a score) is an important component of this course. Attendance at concert performances is strongly encouraged and is considered to be an extension of classroom activities. In order to meet the rigorous requirements, students are expected to work outside the classroom, beyond scheduled periods, and use libraries and the internet as an enhancement of the curriculum.

Methods may include:

1. Individual performances
2. Ear training and sight singing exercises

3. Homework preparation
4. Class participation
5. Written tests
6. Analytical listening and concert attendance
7. Oral and written reports
8. Class discussion
9. Student-generated compositions
10. Advanced Placement Exam

In terms of proficiency level the East Brunswick grades equate to:

A	Excellent	Advanced Proficient
B	Good	Above Proficient
C	Fair	Proficient
D	Poor	Minimally proficient
F	Failing	Partially Proficient

COURSE EVALUATION

In AP Music Theory, the goal is that a minimum of 95% of all pupils will achieve at least minimum proficiency (D or better) relative to the NJSLs set for this course. The department will review student achievement at all levels of proficiency relative to marking period grades, and if necessary, the individual components and assignments comprising these grades. Student achievement will further be analyzed to compare the achievement of the total enrollment vs. sub-groups to determine course areas requiring greater support or modification. As a result of the analysis, decisions will be made concerning modifications to course content and/or instructional methodology.
