Course Overview

This one-quarter, hybrid course in journalism and media encourages students to explore and create various types of popular media (such as news reports, reviews, editorials, video broadcasts, podcasts, etc). Students will learn to critically examine the structure, tone, and bias of the media they interact with daily, in order to better understand how the media frames and manipulates information and public opinion. Students will then use that media as models for their own creations and will compile their work online in a collaborative portfolio. Ideal candidates for this course are motivated, self-directed learners who are able to complete and submit tasks independently.

Course Scope and Sequence

UNIT 1: The Rise of Digital Journalism (Weeks 1-6)

In this unit learners will examine the evolution of journalism from primarily print media to primarily digital media, and will explore the implications of these cultural and global changes. Students will examine and create different modes of journalistic writing (such as the basic news report, review, how to, process analysis, interview, and opinion article by engaging in teacher guided activities, and writing tasks. Students will create and develop an online portfolio where all of their articles will be published.

UNIT 2: Self-Directed Newsroom (Weeks 7-10)

In this unit learners will develop their journalistic style through self-directed reporting. With teacher approval, students will write articles of their choosing in order to acrue a certain number of points. For example, one student may choose to write 7 basic news articles; where another student may script, film, and edit a video broadcast of a single story. Based on individual style and preference, students may choose to experiment with podcasts, broadcasts, photojournalism, or the article types examinined in Unit 1.

UNIT 3: Web Portfolio (Ongoing)

All student writing will be published online in a web portfolio. Web portfolios (or blogs) will be fully personalized and include relevant graphic design choices that aid in communicating the student's personal style. Students should aim to develop a theme across articles and projects, and will present their final portfolio and personal course reflections for the final exam.

Grading and Evaluation Guidelines

GRADING PROCEDURES

Marking period grades are determined by dividing the total number of points earned by the total number of potential points. More intense and involved assessments are worth more points and therefore have a greater effect on a student's grade. Formal and informal writing assignments, responses to text and reading quizzes are frequently assigned. Participation in online moodle or google classroom activities will comprise a large

portion of a student's grade.

The department's goal for every course is that a minimum of 95% of the pupils will meet at least the minimum proficiency level (D or better) set for the course. The department will analyze the achievement of students on Unit Assessments, Mid-term and Final Exams and Final Course Grades, and for Final Course Grades the achievement of sub-groups identified by the state to determine if modifications in the curriculum and instructional methods are needed.

In terms of proficiency level the East Brunswick grades equate to:

A	Excellent	Advanced Proficient				
В	Good	Above Average Proficient				
C	Fair	Proficient				
D	Poor	Minimally proficient				
F	Failing	Partially Proficient
