Course Description

AP World History is designed to be the equivalent of a two-semester introductory college or university world history course. In AP World History students investigate significant events, individuals, developments, and processes in six historical periods from approximately 8000 B.C.E. to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; making historical comparisons; utilizing reasoning about contextualization, causation, and continuity and change over time; and developing historical arguments. The course provides five themes that students explore throughout the course in order to make connections among historical developments in different times and places: interaction between humans and the environment; development and interaction of cultures; state building, expansion, and conflict; creation, expansion, and interaction of economic systems; and development and transformation of social structures.

Class Materials

Textbook:

Hansen, V. & Curtis, K. *Voyages in World History* (3rd Ed.). Cengage. Boston, MA. 2017.

Units of Study

Unit 1: Key Concept 1.1-1.3

Essential Theme: Technological and environmental transformations, 8,000 BCE to 600 BCE

Essential Question: How did humans form early civilizations?

Unit 2: Key Concept 2.1

Essential Theme: As states and empires increased in size and contacts between regions intensified, human communities transformed their religious and ideological beliefs and practices.

Essential Question: How did the development of states affect religious beliefs?

Unit 3: Key Concept 2.2

Essential Theme: As the early states and empires grew in number, size, and population, they frequently competed for resources and came into conflict with one another.

Essential Question: Why did the expansion of empires lead to conflict?

Unit 4: Key Concept 2.3

Essential Theme: With the organization of large-scale empires, transregional trade intensified, leading to the creation of extensive networks of commercial and cultural exchange.

Essential Question: How do the reach of empires impact and influence one another?

Unit 5: Key Concept 3.1

Essential Theme: A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

Essential Question: How did people benefit and suffer from early interactions across regions?

Unit 6: Key Concept 3.2

Essential Theme: State formation and development demonstrated continuity, innovation, and diversity in various regions.

Essential Question: How did the development of states foster innovation and diversity in those societies? In general, who benefited most from this change? Why?

Unit 7: Key Concept 3.3

Essential Theme: Changes in trade networks resulted from and stimulated increasing productive capacity, with important implications for social and gender structures and environmental processes.

Essential Question: In what ways did innovations in trade spur economies across the globe? How did this growth impact the gender and ethnic paradigms that were already in place?

Unit 8: Key Concept 4.1

Essential Theme: The interconnection of the Eastern and Western Hemispheres, made possible by transoceanic voyaging, transformed trade and religion and had a significant economic, cultural, social, and demographic impact on the world.

Essential Question: How did the emergence of travel between the hemispheres provoke major changes to economic and social systems? Who benefited and suffered most from this development?

Unit 9: Key Concept 4.2

Essential Theme: Although the world's productive systems continued to be heavily centered on agriculture, major changes occurred in agricultural labor, the systems and locations of manufacturing, gender and social structures, and environmental processes.

Essential Question: In what ways did innovations in farming and manufacturing have a profound impact on areas beyond the economy (ex. Social structures and the environment)?

Unit 10: Key Concept 4.3

Essential Theme: Empires expanded around the world, presenting new challenges in the incorporation of diverse populations and in the effective administration of new coerced labor systems.

Essential Question: As empires began to spread their influence across the globe, how did this present challenges to native peoples? In what ways did this expansion impact economies and the local labor forces?

Unit 11: Key Concept 5.1

Essential Theme: The process of industrialization changed the way in which goods were produced and consumed, with far reaching effects on the global economy, social relations, and culture.

Essential Question: How did international industrialization make societies more interconnected? Who benefited and suffered the most from this development?

Unit 12: Key Concept 5.2

Essential Theme: As states industrialized, they also expanded existing overseas empires and established new colonies and transoceanic relationships.

Essential Question: Why did some nations pursue international expansion more aggressively than others? What were some nations that were too vigorous in their empire building and what was their fate?

Unit 13: Key Concept 5.3

Essential Theme: The 18th century marked the beginning of an intense period of revolution and rebellion against existing governments, leading to the establishment of new nation-states around the world.

Essential Question: What were the conditions that were in place that led to a series of armed rebellions across multiple regions during the 18th century? Why was the American revolution more successful than others?

Unit 14: Key Concept 5.4

Essential Theme: As a result of the emergence of transoceanic empires and a global capitalist economy, migration patterns changed dramatically, and the numbers of migrants increased significantly.

Essential Question: In what ways does economic transformation impact migration? Which regions were impacted most by this change? In general, was this change positive or negative?

Unit 15: Key Concept 6.1

Essential Theme: Rapid advances in science and technology altered the understanding of the universe and the natural world and led to advances in communication, transportation, industry, agriculture, and medicine.

Essential Question: Why did the 20th century witness such incredible growth in the fields of science and technology? Which societies benefited most from these rapid innovations?

Unit 16: Key Concept 6.2

Essential Theme: Peoples and states around the world challenged the existing political and social order in varying ways, leading to unprecedented worldwide conflicts.

Essential Question: Did the network of alliances that emerged near the outset of the 20th century make a world war inevitable? In what ways did these two world wars alter the political and social balance that had previously existed? Was this an overall positive change?

Unit 17: Key Concept 6.3

Essential Theme: The role of the state in the domestic economy varied, and new institutions of global association emerged and continued to develop throughout the century.

Essential Question: How does our modern world continue to reflect a network of somewhat fluid alliances? In what ways are these alliances different and similar to the ones that led us down the path of a series of wars?

during the 20th century?

SOC.6.2.12.CS3	Age of Revolutions: Political and Industrial Revolutions, Imperialism, Reform, and Global Impact: Discontent with prevailing economic, political, and social conditions was the impetus for change, which resulted in revolution or reform. The Industrial Revolution was a consequence of technological innovation and expanding economic activity and markets, resulting in massive population movement, urbanization, and the development of complex economic systems. Industrialized nations embarked on a competitive race for global resources and markets, resulting in the establishment of political and economic control over large regions of the world that had a lasting impact.

The failure of the Treaty of Versailles, the impact of the global depression, and the expansionist policies and actions of Axis nations are viewed as major factors that resulted in World War II. World Wars I and II were "total wars" in which nations mobilized entire populations and economies and employed new military tactics that resulted in unprecedented death and destruction, as well as drastic changes in political boundaries. World Wars I and II challenged economic and political power structures and gave rise to a new balance of power in the world.
