Course Adoption: 04/21/1986

Curriculum Adoption: 09/10/1992

### **Course Overview**

Biology is designed for students who will benefit from a strong focus on developing science and engineering skills. Biology introduces students to broad aspects of the biological sciences including the structure and function of matter and organisms, inheritance and variation of traits in living things, organisms and their interdependent relationships including the effects of humans on the environment, natural selection and evolution. Students experience a variety of learning strategies, to assist students in developing group skills and scientific knowledge that will prepare them for continued study in the sciences, including cooperative group interaction, discussion, demonstration and laboratory experimentation. In all of these activities students incorporate content into their critical thinking. Many different learning strategies are employed.

#### **Modifications**

Each teacher, each student, each classroom is unique and adaptations are specific to each situation. Differentiating instruction and providing multiple ways to assess allows more flexibility for students to meet the standards and requirements of the class. Below are samples of the types of adaptations/modifications that may occur for students based on need including ELLs, students with a 504 Plan, Special Education, Basic Skills and Gifted and Talented students.

#### Adaptations/Modifications:

| •  |   |  |
|--|---|--|
| Input<br>Adapt the way instruction is<br>delivered to the learner.<br>For example:<br>• Use different visual aids,<br>• Plan more concrete<br>examples,<br>• Provide hands-on<br>activities,<br>• Place students in<br>cooperative groups. | Output<br>Adapt how the learner can<br>respond to instruction.<br>For example:<br>• Allow a verbal vs. written<br>response,<br>• Use a communication book<br>for students,<br>• Allow students to show<br>knowledge with hands-on<br>materials. | Time<br>Adapt the time allotted and<br>allowed for learning, task<br>completion or testing.<br>For example:<br>• Individualize a timeline<br>for completing a task,<br>• Pace learning differently<br>(increase or decrease)<br>for some learners. |
| Difficulty<br>Adapt the skill level, problem<br>type, or the rules on how the<br>learner may approach the work.<br>For example:<br>• Simplify task directions.<br>• Use of calculator.   | Level of Support<br>Increase the amount of personal<br>assistance with specific learner.<br><i>For example:</i><br>• Assign peer buddies,<br>teaching assistants, peer<br>tutors or cross-age tutors.   | Size<br>Adapt the number of items that the<br>learner is expected to learn or<br>complete.<br><i>For example:</i><br>• Reduce the number of<br>vocabulary words a learner<br>must learn at any one time.   |
| Degree of Participation<br>Adapt the extent to which a<br>learner is actively involved in the<br>task.   | Alternate Goals<br>Adapt the goals or outcome<br>expectations while using the<br>same materials.  | Substitute Curriculum<br>Provide differentiated instruction<br>and materials to meet a learner's<br>individual goals.  |

#### For example:

• Allow for small group/individual presentations vs. presentations to the whole class.

#### For example:

• Students in the same class are expected to either write a paragraph, write a bulleted response, or meet with the teacher to provide a verbal response.

#### For example:

- Individualize a timeline for completing a task, pace learning differently (increase or decrease) for some learners,
- Use of Learning Ally.

#### **Materials and Resources**

Biology, Miller, K. & J. Levine, Prentice Hall, 2014

ISBN: 9780133235746

### **Content Specific Standards**

| SCI.HS-PS1   | Matter and Its Interactions  |  |
|--------------|--|--|
| SCI.HS-PS1-2 | Construct and revise an explanation for the outcome of a simple chemical reaction based<br>on the outermost electron states of atoms, trends in the periodic table, and knowledge of<br>the patterns of chemical properties. |  |
|              | Constructing Explanations and Designing Solutions  |  |
| SCI.HS.PS1.A | Structure and Properties of Matter   |  |
| SCI.HS.PS1.B | Chemical Reactions   |  |
| SCI.HS-PS1-8 | Develop models to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and radioactive decay.   |  |
| SCI.HS.PS1.C | Nuclear Processes  |  |
| SCI.HS-LS1   | From Molecules to Organisms: Structures and Processes  |  |
| SCI.HS-LS1-1 | Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.                           |  |

| SCI.HS.LS1.A | Structure and Function   |  |
|--------------|--|--|
| SCI.HS-LS1-2 | Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.   |  |
|              | Systems and System Models  |  |
| SCI.HS-LS1-3 | Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.   |  |
| SCI.HS-LS1-4 | Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.  |  |
| SCI.HS.LS1.B | Growth and Development of Organisms  |  |
| SCI.HS-LS1-5 | Use a model to illustrate how photosynthesis transforms light energy into stored chemical energy.  |  |
| SCI.HS-LS1-6 | Construct and revise an explanation based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids and/or other large carbon-based molecules.                 |  |
| SCI.HS-LS1-7 | Use a model to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules and oxygen molecules are broken and the bonds in new compounds are formed resulting in a net transfer of energy. |  |
|              | Developing and Using Models  |  |
| SCI.HS.LS1.C | Organization for Matter and Energy Flow in Organisms   |  |
| SCI.HS-LS2   | Ecosystems: Interactions, Energy, and Dynamics   |  |
| SCI.HS.LS2.A | Interdependent Relationships in Ecosystems   |  |
|              | Scale, Proportion, and Quantity  |  |
| SCI.HS-LS2-2 | Use mathematical representations to support and revise explanations based on evidence about factors affecting biodiversity and populations in ecosystems of different scales.  |  |
| SCI.HS.LS2.C | Ecosystem Dynamics, Functioning, and Resilience  |  |
| SCI.HS-LS2-3 | Construct and revise an explanation based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions.  |  |
| SCI.HS-LS2-4 | Use mathematical representations to support claims for the cycling of matter and flow of energy among organisms in an ecosystem.   |  |
| SCI.HS.LS2.B | Cycles of Matter and Energy Transfer in Ecosystems   |  |
|              | Energy and Matter  |  |
| SCI.HS-LS2-5 | Develop a model to illustrate the role of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and geosphere.  |  |
| SCI.HS.PS3.D | Energy in Chemical Processes   |  |
|              | Stability and Change   |  |
| SCI.HS-LS2-7 | Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.  |  |
| SCI.HS.LS4.D | Biodiversity and Humans  |  |
| SCI.HS-LS2-8 | Evaluate the evidence for the role of group behavior on individual and species' chances to survive and reproduce.  |  |
| SCI.HS.LS2.D | Social Interactions and Group Behavior   |  |
| SCI.HS-LS3   | Heredity: Inheritance and Variation of Traits  |  |
| SCI.HS-LS3-1 | Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.  |  |

|               | Asking Questions and Defining Problems  |
|---------------|---|
| SCI.HS.LS3.A  | Inheritance of Traits   |
| SCI.HS-LS3-2  | Make and defend a claim based on evidence that inheritable genetic variations may result from: (1) new genetic combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors.  |
|               | Engaging in Argument from Evidence  |
| SCI.HS.LS3.B  | Variation of Traits   |
| SCI.HS-LS3-3  | Apply concepts of statistics and probability to explain the variation and distribution of expressed traits in a population.   |
|               | Analyzing and Interpreting Data   |
| SCI.HS-LS4    | Biological Evolution: Unity and Diversity   |
| SCI.HS-LS4-1  | Communicate scientific information that common ancestry and biological evolution are supported by multiple lines of empirical evidence.   |
|               | Obtaining, Evaluating, and Communicating Information  |
| SCI.HS.LS4.A  | Evidence of Common Ancestry and Diversity   |
| SCI.HS-LS4-2  | Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment. |
| SCI.HS-LS4-3  | Apply concepts of statistics and probability to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait.  |
| SCI.HS.LS4.B  | Natural Selection   |
|               | Patterns  |
| SCI.HS-LS4-4  | Construct an explanation based on evidence for how natural selection leads to adaptation of populations.  |
| SCI.HS.LS4.C  | Adaptation  |
|               | Cause and Effect  |
| SCI.HS-LS4-5  | Evaluate the evidence supporting claims that changes in environmental conditions may result in: (1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species.  |
| SCI.HS-LS4-6  | Create or revise a simulation to test a solution to mitigate adverse impacts of human activity on biodiversity.   |
| SCI.HS-ESS3   | Earth and Human Activity  |
| SCI.HS-ESS3-1 | Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and climate change have influenced human activity.   |
| SCI.HS.ESS3.A | Natural Resources   |
| SCI.HS.ESS3.B | Natural Hazards   |
| SCI.HS-ESS3-3 | Create a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity.   |
| SCI.HS.ESS3.C | Human Impacts on Earth Systems  |
| SCI.HS-ESS3-5 | Analyze geoscience data and the results from global climate models to make an evidence-<br>based forecast of the current rate of global or regional climate change and associated future impacts to Earth systems.  |
| SCI.HS-ESS3-6 | Use a computational representation to illustrate the relationships among Earth systems  |

|               | and how those relationships are being modified due to human activity (i.e., climate change).  |  |
|---------------|---|--|
|               | Using Mathematics and Computational Thinking  |  |
| SCI.HS.ESS2.D | Weather and Climate   |  |
| SCI.HS.ESS3.D | Global Climate Change   |  |
| SCI.HS-ETS1   | Engineering Design  |  |
| SCI.HS-ETS1-1 | Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants.  |  |
| SCI.HS.ETS1.A | Delimiting Engineering Problems   |  |
| SCI.HS-ETS1-2 | Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.  |  |
| SCI.HS.ETS1.C | Optimizing the Design Solution  |  |
| SCI.HS-ETS1-3 | Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts. |  |
| SCI.HS-ETS1-4 | Use a computer simulation to model the impact of proposed solutions to a complex real-<br>world problem with numerous criteria and constraints on interactions within and between<br>systems relevant to the problem.   |  |
| SCI.HS.ETS1.B | Developing Possible Solutions   |  |

# Interdisciplinary Standards

| MA.S-ID.A.2   | Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.      |
|---------------|---|
| MA.S-ID.A.3   | Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).  |
| MA.S-ID.B.6   | Represent data on two quantitative variables on a scatter plot, and describe how the variables are related.   |
| MA.S-ID.C.7   | Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.  |
| MA.S-ID.C.9   | Distinguish between correlation and causation.  |
| LA.RST.9-10.1 | Accurately cite strong and thorough evidence from the text to support analysis of science and technical texts, attending to precise details for explanations or descriptions.                   |
| LA.RST.9-10.2 | Determine the central ideas, themes, or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. |
| MA.S-IC.A.1   | Understand statistics as a process for making inferences about population parameters based on a random sample from that population.   |
| LA.RST.9-10.3 | Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. |
| MA.S-IC.A.2   | Decide if a specified model is consistent with results from a given data-generating process, e.g., using simulation.  |
| LA.RST.9-10.4 | Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9-10                 |

texts and topics.

|                | texts and topics.   |
|----------------|---|
| LA.RST.9-10.5  | Analyze the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).  |
| MA.S-IC.B.3    | Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.  |
| LA.RST.9-10.6  | Determine the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question the author seeks to address.   |
| MA.S-IC.B.4    | Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.  |
| MA.S-IC.B.5    | Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.   |
| LA.RST.9-10.7  | Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.  |
| LA.RST.9-10.8  | Determine if the reasoning and evidence in a text support the author's claim or a recommendation for solving a scientific or technical problem.   |
| MA.S-IC.B.6    | Evaluate reports based on data.   |
| LA.RST.9-10.9  | Compare and contrast findings presented in a text to those from other sources (including their own experiments), noting when the findings support or contradict previous explanations or accounts.  |
| MA.S-CP.A.1    | Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events ("or," "and," "not").   |
| LA.RST.9-10.10 | By the end of grade 10, read and comprehend science/technical texts in the grades 9-10 text complexity band independently and proficiently.   |
| LA.WHST.9-10.1 | Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant sufficient textual and non-textual evidence.  |
| LA.WHST.9-10.2 | Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.   |
| MA.S-MD.A.2    | Calculate the expected value of a random variable; interpret it as the mean of the probability distribution.  |
| LA.WHST.9-10.4 | Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.  |
| LA.WHST.9-10.5 | Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.  |
| LA.WHST.9-10.6 | Use technology, including the Internet, to produce, share, and update writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.   |
| LA.WHST.9-10.7 | Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.  |
| LA.WHST.9-10.8 | Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation. |
| LA.WHST.9-10.9 | Draw evidence from informational texts to support analysis, reflection, and research.   |

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

## 21st Century Life and Career Ready Practice Standards

| CRP.K-12.CRP1.1 | Career-ready individuals understand the obligations and responsibilities of being a member of a community, and they demonstrate this understanding every day through their interactions with others. They are conscientious of the impacts of their decisions on others and the environment around them. They think about the near-term and long-term consequences of their actions and seek to act in ways that contribute to the betterment of their teams, families, community and workplace. They are reliable and consistent in going beyond the minimum expectation and in participating in activities that serve the greater good.                    |
|-----------------|--|
| CRP.K-12.CRP2.1 | Career-ready individuals readily access and use the knowledge and skills acquired through experience and education to be more productive. They make connections between abstract concepts with real-world applications, and they make correct insights about when it is appropriate to apply the use of an academic skill in a workplace situation.  |
| CRP.K-12.CRP3.1 | Career-ready individuals understand the relationship between personal health, workplace performance and personal well-being; they act on that understanding to regularly practice healthy diet, exercise and mental health activities. Career-ready individuals also take regular action to contribute to their personal financial well-being, understanding that personal financial security provides the peace of mind required to contribute more fully to their own career success.  |
| CRP.K-12.CRP4.1 | Career-ready individuals communicate thoughts, ideas, and action plans with clarity, whether using written, verbal, and/or visual methods. They communicate in the workplace with clarity and purpose to make maximum use of their own and others' time. They are excellent writers; they master conventions, word choice, and organization, and use effective tone and presentation skills to articulate ideas. They are skilled at interacting with others; they are active listeners and speak clearly and with purpose. Career-ready individuals think about the audience for their communication and prepare accordingly to ensure the desired outcome. |
| CRP.K-12.CRP5.1 | Career-ready individuals understand the interrelated nature of their actions and regularly make decisions that positively impact and/or mitigate negative impact on other people, organization, and the environment. They are aware of and utilize new technologies, understandings, procedures, materials, and regulations affecting the nature of their work as it relates to the impact on the social condition, the environment and the profitability of the organization.   |
| CRP.K-12.CRP6.1 | Career-ready individuals regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.   |
| CRP.K-12.CRP7.1 | Career-ready individuals are discerning in accepting and using new information to make decisions, change practices or inform strategies. They use reliable research process to search for new information. They evaluate the validity of sources when considering the use and adoption of external information or practices in their workplace situation.  |
| CRP.K-12.CRP8.1 | Career-ready individuals readily recognize problems in the workplace, understand the nature of the problem, and devise effective plans to solve the problem. They are aware of problems when they occur and take action quickly to address the problem; they thoughtfully investigate the root cause of the problem prior to introducing solutions. They   |

|                  | carefully consider the options to solve the problem. Once a solution is agreed upon, they follow through to ensure the problem is solved, whether through their own actions or the actions of others.   |
|------------------|---|
| CRP.K-12.CRP9.1  | Career-ready individuals consistently act in ways that align personal and community-held ideals and principles while employing strategies to positively influence others in the workplace. They have a clear understanding of integrity and act on this understanding in every decision. They use a variety of means to positively impact the directions and actions of a team or organization, and they apply insights into human behavior to change others' action, attitudes and/or beliefs. They recognize the near-term and long-term effects that management's actions and attitudes can have on productivity, morals and organizational culture.   |
| CRP.K-12.CRP10.1 | Career-ready individuals take personal ownership of their own education and career goals,<br>and they regularly act on a plan to attain these goals. They understand their own career<br>interests, preferences, goals, and requirements. They have perspective regarding the<br>pathways available to them and the time, effort, experience and other requirements to<br>pursue each, including a path of entrepreneurship. They recognize the value of each step<br>in the education and experiential process, and they recognize that nearly all career paths<br>require ongoing education and experience. They seek counselors, mentors, and other<br>experts to assist in the planning and execution of career and personal goals. |
| CRP.K-12.CRP11.1 | Career-ready individuals find and maximize the productive value of existing and new technology to accomplish workplace tasks and solve workplace problems. They are flexible and adaptive in acquiring new technology. They are proficient with ubiquitous technology applications. They understand the inherent risks-personal and organizational-of technology applications, and they take actions to prevent or mitigate these risks.  |
| CRP.K-12.CRP12.1 | Career-ready individuals positively contribute to every team, whether formal or informal.<br>They apply an awareness of cultural difference to avoid barriers to productive and positive<br>interaction. They find ways to increase the engagement and contribution of all team<br>members. They plan and facilitate effective team meetings.   |

# Technology Standards

| TECH.8.1.12.A.3   | Collaborate in online courses, learning communities, social networks or virtual worlds to discuss a resolution to a problem or issue.  |
|-------------------|--|
| TECH.8.1.12.A.4   | Construct a spreadsheet workbook with multiple worksheets, rename tabs to reflect the data on the worksheet, and use mathematical or logical functions, charts and data from all worksheets to convey the results. |
| TECH.8.1.12.A.5   | Create a report from a relational database consisting of at least two tables and describe the process, and explain the report results.   |
| TECH.8.1.12.D.1   | Demonstrate appropriate application of copyright, fair use and/or Creative Commons to an original work.  |
| TECH.8.1.12.E.CS2 | Locate, organize, analyze, evaluate, synthesize, and ethically use information from a variety of sources and media.  |
| TECH.8.1.12.F.1   | Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.   |
| TECH.8.1.12.F.CS1 | Identify and define authentic problems and significant questions for investigation.  |
| TECH.8.1.12.F.CS2 | Plan and manage activities to develop a solution or complete a project.  |
| TECH.8.2.12.B.2   | Evaluate ethical considerations regarding the sustainability of environmental resources that are used for the design, creation and maintenance of a chosen product.  |
| TECH.8.2.12.B.3   | Analyze ethical and unethical practices around intellectual property rights as influenced by human wants and/or needs.   |

| TECH.8.2.12.B.4   | Investigate a technology used in a given period of history, e.g., stone age, industrial revolution or information age, and identify their impact and how they may have changed to meet human needs and wants. |
|-------------------|---|
| TECH.8.2.12.B.CS2 | The effects of technology on the environment.   |
| TECH.8.2.12.C.1   | Explain how open source technologies follow the design process.   |
| TECH.8.2.12.C.CS2 | The application of engineering design.  |
| TECH.8.2.12.D.CS1 | Apply the design process.   |

## Pacing Guide

| Marking Period 1    |                    |  |
|---------------------|--------------------|--|
| Торіс               | Pacing<br>(Blocks) |  |
| Intro/ Biomolecules | 5                  |  |
| Energy              | 7                  |  |
| Homeostasis         | 6                  |  |

| Marking Period 2   |                    |  |
|--|--------------------|--|
| Торіс  | Pacing<br>(Blocks) |  |
| DNA, proteins, gene expression   | 8                  |  |
| Cells-<br>(Cell cycle, mitosis, meiosis,<br>cancer, stem cells,<br>differentiation, variation) | 7                  |  |
| Genetic Engineering  | 1                  |  |

| Marking Period 3                                     |                    |  |
|--|--------------------|--|
| Торіс  | Pacing<br>(Blocks) |  |
| Coevolution of Life & Earth<br>Systems (Early Earth) | 3                  |  |
| Evidence for Evolution                               | 4                  |  |
| Genetic Inheritance & Natural<br>Selection           | 9                  |  |
| Human Evolution                                      | 0.5                |  |
| Animal Group Behavior                                | 1                  |  |

| Marking Period 4  |                    |  |
|---|--------------------|--|
| Торіс   | Pacing<br>(Blocks) |  |
| Energy in Ecosystems: Food<br>Chains/Webs/ Pyramids<br>(trophic cascades and<br>succession) | 6                  |  |
| Interdependence and Population<br>Dynamics<br>(invasive species)                            | 6                  |  |
| Nutrient Cycles (Water and Nitrogen)  | 4                  |  |
| Climate Change/ Carbon Cycle  | 6                  |  |

**Formative and Summative Assessment** Teachers ultilize a variety of methods for assessment including:

|                      | Unit Tests and<br>Quizzes   | Labs, Projects &<br>Classwork   | Lab Assessments  | Homework   |
|----------------------|---|---|--|--|
| Category<br>Criteria | Individual<br>assessments based on<br>specific or general<br>content knowledge. | Any group work<br>primarily completed in<br>class to be checked<br>and/or graded for<br>completion. | Individual assessments<br>based on group lab work.<br>Lab data and other notes<br>may sometimes be used. | Any work assigned<br>to be completed<br>outside of the<br>classroom. |

All students take a common Midterm and Final Exam.

**Grading and Evaluation Guidelines** Marking period grades for Academic Biology will be determined using the following weighting:

| Grading<br>Category   | Tests & Quizzes        | Labs, Projects, Classwork & Lab<br>Assessments | Homework                |
|-----------------------|------------------------|--|-------------------------|
| Grading<br>Percentage | 50%                    | 20%  | 5%                      |
| Category              | Individual assessments | Any group work primarily completed             | Any work assigned to be |

| Criteria | based on specific or general content knowledge. | in class to be checked and/or graded for completion.  | completed outside of the classroom. |
|----------|---|---|-------------------------------------|
|          |   | Individual assessments based on group lab work. Lab data and other notes may sometimes be used. |                                     |

The final grade for Academic Biology will be computed using six scores.

Each marking period grade will account for 20%. Midterm grades and final exam grades will account for 10% each.

20% Marking Period 1

20% Marking Period 2

20% Marking Period 3

20% Marking Period 4

10% MidTerm Exam

10% Final Exam
