

CAE-Unit-Plan-3C-Curriculum-Development-Intersections

Content Area: **CTE**
Course(s): **Computer Aided Engineering**
Time Period: **September**
Length: **1**
Status: **Published**

Enduring Understandings

The following synthesizes the important ideas and core processes that are central to the CAD discipline and will have lasting value beyond the classroom:

- Creating of development drawing
- Sheet metal work
- Model construction:
 - Pattern for a 3 piece elbow
 - Pattern for gutters
 - pattern for a pyramid
 - pattern of a cone
 - Triangulation
 - Intersection of cylinders

Essential Questions

- What do we refer to development in industry?
- What is a parallel line development?
- What is triangulation?
- What is the line of intersection?
- What is the figure of intersection?

Standards/Indicators/Student Learning Objectives (SLOs)

ARCH.9-12.3	Maintenance and Operations
ARCH.9-12.9.4.12.B.(2).4	Identify project turnover procedures needed to successfully manage construction projects.
ARCH.9-12.9.4.12.B.(2).5	Plan building in accordance with contracts to meet budget and schedule.
ARCH.9-12.9.4.12.B.(2).6	Describe testing and inspection procedures used to ensure successful completion of construction projects.
ARCH.9-12.9.4.12.B.(2).7	Assess the purpose for scheduling as it relates to successful completion of construction projects.
ARCH.9-12.9.4.12.B.(2).8	Identify closeout procedures needed to effectively complete construction projects.
ARCH.9-12.9.4.12.B.(2).9	Demonstrate understanding of risk management principles and other strategies and

	tactics used to maintain, increase, or decrease risk.
ARCH.9-12.9.4.12.B.(2).10	Create a jobsite safety program to ensure safe practices and procedures.
ARCH.9-12.9.4.12.B.(2).12	Describe procedures for jobsite security to prevent liability.
ARCH.9-12.9.4.12.B.(2).15	Demonstrate knowledge of proper changeover procedures for successful completion of a construction project.
ARCH.9-12.9.4.12.B.(2).16	Examine building systems and components to evaluate their usefulness to construction projects.
ARCH.9-12.9.4.12.B.(2).17	Use craft skills to meet or exceed teacher and/or employer expectations.
ARCH.9-12.9.4.12.B.(3).1	Recognize and employ universal construction signs and symbols to function safely.
ARCH.9-12.9.4.12.B.(3).2	Use troubleshooting procedures when solving a maintenance problem to maintain project.
ARCH.9-12.9.4.12.B.(3).3	Apply construction skills when completing classroom projects and/or repairing, restoring, or renovating existing worksite structures to ensure long-term use of buildings and structures.
ARCH.9-12.9.4.12.B.(3).4	Evaluate and assess an existing structure to determine the repairs or renovations required to restore operation of the structure.
ARCH.9-12.9.4.12.B.(3).5	Plan and practice preventive maintenance activities to service existing structures.
ARCH.9-12.9.4.12.B.1	Demonstrate language arts knowledge and skills required to pursue the full range of postsecondary education and career opportunities.
ARCH.9-12.9.4.12.B.2	Demonstrate mathematics knowledge and skills required to pursue the full range of postsecondary education and career opportunities.
ARCH.9-12.9.4.12.B.3	Demonstrate science knowledge and skills required to pursue the full range of postsecondary education and career opportunities.
ARCH.9-12.9.4.12.B.4	Perform math operations, such as estimating and distributing materials and supplies, to complete classroom/workplace tasks.
ARCH.9-12.9.4.12.B.5	Apply principles of physics, as they relate to worksite/jobsite situations, to work with materials and load applications.
ARCH.9-12.9.4.12.B.7	Demonstrate use of the concepts, strategies, and systems for obtaining and conveying ideas and information to enhance communication.
ARCH.9-12.9.4.12.B.8	Locate, organize, and reference written information from various sources to communicate with others.
ARCH.9-12.9.4.12.B.9	Evaluate and use information resources to accomplish specific occupational tasks.
	Roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment impact business operations. Key organizational systems impact organizational performance and the quality of products and services. Understanding the global context of 21st-century industries and careers impacts business operations.
	All clusters rely on effective oral and written communication strategies for creating, expressing, and interpreting information and ideas that incorporate technical terminology and information.
	Academic concepts lay the foundation for the full range of career and post-secondary education opportunities within the career cluster.

Lesson Titles

- Model Construction
- Parallel Line Developments
- Pattern of Oblique Cylinders

- Pattern of a three piece elbow
- Pattern of a pyramid
- Triangulation
- Intersections

Career Readiness, Life Literacies, & Key Skills

TECH.9.4.12.CI.1	Demonstrate the ability to reflect, analyze, and use creative skills and ideas (e.g., 1.1.12prof.CR3a).
TECH.9.4.12.CI.2	Identify career pathways that highlight personal talents, skills, and abilities (e.g., 1.4.12prof.CR2b, 2.2.12.LF.8).
TECH.9.4.12.CI.3	Investigate new challenges and opportunities for personal growth, advancement, and transition (e.g., 2.1.12.PGD.1).
TECH.9.4.12.CT.1	Identify problem-solving strategies used in the development of an innovative product or practice (e.g., 1.1.12acc.C1b, 2.2.12.PF.3).
TECH.9.4.12.CT.2	<p>Explain the potential benefits of collaborating to enhance critical thinking and problem solving (e.g., 1.3E.12profCR3.a).</p> <p>With a growth mindset, failure is an important part of success.</p> <p>Collaboration with individuals with diverse experiences can aid in the problem-solving process, particularly for global issues where diverse solutions are needed.</p> <p>Innovative ideas or innovation can lead to career opportunities.</p>

Inter-Disciplinary Connections

- Applied **Mathematics**
- **Arts** Related to Product "Form"
- **Historical** References & Perspectives
- Technical **Literacy**
- Applied **Sciences**

0x	Connections to Equations.
0x	<p>During high school, students begin to formalize their geometry experiences from elementary and middle school, using more precise definitions and developing careful proofs. Later in college some students develop Euclidean and other geometries carefully from a small set of axioms.</p> <p>In real world problems, the answers are usually not numbers but quantities: numbers with units, which involves measurement. In their work in measurement up through Grade 8, students primarily measure commonly used attributes such as length, area, and volume. In high school, students encounter a wider variety of units in modeling, e.g., acceleration, currency conversions, derived quantities such as person-hours and heating degree days, social science rates such as per-capita income, and rates in everyday life such as points scored per game or batting averages. They also encounter novel situations in which they themselves must conceive the attributes of interest. For example, to find a good measure of overall highway safety, they might propose measures such as fatalities per year, fatalities per year per driver, or fatalities per vehicle-mile traveled. Such a conceptual process is sometimes called quantification.</p>
0x	

Quantification is important for science, as when surface area suddenly “stands out” as an important variable in evaporation. Quantification is also important for companies, which must conceptualize relevant attributes and create or choose suitable measures for them.

LA.9- 0x10.RH.9- 10.3	Analyze in detail a series of events described in a text; draw connections between the events, to determine whether earlier events caused later ones or simply preceded them.
LA.9- 0x10.RH.9- 10.9	Compare and contrast treatments of the same topic, or of various perspectives, in several primary and secondary sources; analyze how they relate in terms of themes and significant historical concepts.
LA.9- 0x10.RST.9- 10.5	Analyze the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).

Equity Considerations

LGBTQ and Disabilities Mandate

Topic: LGBT Engineers

Materials Used: https://queerbio.com/wiki/index.php?title=LGBTQ_Engineers

Addresses the Following Component of the Mandate:

- Economic
- Political
- Social

Asian American Pacific Islander Mandate

Topic: Asian Americans in Engineering

Materials Used: <https://www.saseconnect.org/>

Addresses the Following Component of the Mandate:

- Economic
- Political
- Social

Climate Change

Topic: Sustainability in engineering

Materials Used: <https://www.theiet.org/impact-society/sustainability-and-climate-change/>

Addresses the Following Component of the Mandate:

- Economic
- Political
- Social

Holocaust Mandate

Topic: Bias in the Engineer workforce

Materials Used: <https://www.nspe.org/resources/pe-magazine/may-2017/bias-the-engineering-workplace#:~:text=This%20bias%20involves%20higher%20or,to%20meet%20a%20diversity%20quota.>

Addresses the Following Component of the Mandate:

- Bias
- Bigotry
- Bullying
- Holocaust Studies
- Prejudice

Amistad

Anticipatory Set

Possibilities of short activities that will focus the student's attention before the actual lesson begins:

1. **Vocabulary connections-** terms and definitions in a short game of "Trash-ketball"
2. **Challenge-** Offer students sketching task and let them try to solve it as a group then present it to the class.
3. **Challenge-** Offer a volunteer student a CAD task and let him/ her solve it on the board.
4. **Use manipulatives or models**
 - **Description:** Teacher will use physical models to prepare students to learn a specific concept or better highlight the critical attributes of new concepts. Teacher will use a variety of models of two or three-dimensional shapes.
1. **Show & Tell:** Use a prop from an article students are about to read related to industry. Examples: Professional drawings - Architectural, Interior Design, Engineering.
2. **Use a visual-** Teacher will use visual aides to encourage students to better connect to new concepts. Examples: Real drawings used in industry- Architectural, Interior Design, Engineering. The teacher will tell students that they have thirty seconds to remember everything they can about the drawing. After the thirty seconds, the teacher will remove the drawings and ask students to recall all they can about them. The teacher will solicit ideas and use this to introduce distinguishing between main idea and supporting details.

Instructional Strategies, Learning Activities, and Levels of Blooms/DOK

Direct Instruction

- **Possibilities include**
 - Structured Overview
 - Lecture
 - Explicit Teaching
 - Drill & Practice
 - Compare & Contrast
 - Didactic Questions
 - Demonstrations
 - Guided & Shared - reading, listening, viewing, thinking

Interactive Instruction

- **Possibilities include**
 - Debates
 - Role Playing
 - Panels
 - Brainstorming
 - Peer Partner Learning

- Discussion
- Laboratory Groups
- Think, Pair, Share
- Cooperative Learning Groups
- Jigsaw
- Problem Solving
- Structured Controversy
- Tutorial Groups
- Interviewing
- Conferencing

Indirect Instruction

- **Possibilities include**
 - Problem Solving
 - Case Studies
 - Reading for Meaning
 - Inquiry
 - Reflective Discussion
 - Writing to Inform
 - Concept Formation
 - Concept Mapping
 - Concept Attainment
 - Cloze Procedure

Independent Study

- **Possibilities include**
 - Essays
 - Computer Assisted Instruction
 - Journals
 - Learning Logs
 - Reports
 - Learning Activity Packages
 - Correspondence Lessons
 - Learning Contracts
 - Homework
 - Research Projects
 - Assigned Questions
 - Learning Centers

Experiential Learning

- **Possibilities include**
 - Field Trips
 - Narratives
 - Conducting Experiments

- Simulations
- Games
- Storytelling
- Focused Imaging
- Field Observations
- Role-playing
- Model Building
- Surveys

Instructional Skills

- **Possibilities include**
 - Explaining
 - Demonstrating
 - Questioning
 - Questioning Technique
 - Wait Time
 - Levels of Questions

Modifications

Instructor implements the following teaching strategies with students who need special accommodations. Instructor also implements specific requirements from the students' individual reports.

- Classroom:
 - Seat student near instruction, avoid distracting stimuli
 - Clarify that student understands directions
 - Cuing student to refocus (verbal/nonverbal)
 - Praise for positive behaviors.
 - Study guides provided, when available. Prior knowledge to upcoming quizzes/tests.
- Standardized Testing:
 - Extra Time
 - Repeating, clarifying, or rewording directions.
- Delsea One – Students benefit from increased opportunities for enrichment and tutoring during Delsea One Tutoring.

At Risk Modifications

- | | |
|-----------------------------------|---|
| • Additional time for assignments | . |
| • Adjusted assignment timelines | . |
| • Agenda book and checklists | . |
| • Answers to be dictated | . |

- Assistance in maintaining uncluttered space .
- Books on tape .
- Concrete examples .
- Extra visual and verbal cues and prompts .
- Follow a routine/schedule .
- Graphic organizers .
- Have students restate information .
- No penalty for spelling errors or sloppy handwriting .
- Peer or scribe note-taking .
- Personalized examples .
- Preferential seating .
- Provision of notes or outlines .
- Reduction of distractions .
- Review of directions .
- Review sessions .
- Space for movement or breaks .
- Support auditory presentations with visuals .
- Teach time management skills .
- Use of a study carrel .
- Use of mnemonics .
- Varied reinforcement procedures .
- Work in progress check .

ELL Modifications

- - Choice of test format (multiple-choice, essay, true-false)
 - Continue practicing vocabulary
 - Provide study guides prior to tests
 - Read directions to the student
 - Read test passages aloud (for comprehension assessment)
 - Vary test formats

IEP & 504 Modifications

- - Allow for redos/retakes
 - Assign fewer problems at one time (e.g., assign only odds or evens)

- Differentiated center-based small group instruction
- Extra time on assessments
- Highlight key directions
- If a manipulative is used during instruction, allow its use on a test
- Opportunities for cooperative partner work
- Provide reteach pages if necessary
- Provide several ways to solve a problem if possible
- Provide visual aids and anchor charts
- Test in alternative site
- Tiered lessons and assignments
- Use of a graphic organizer
- Use of concrete materials and objects (manipulatives)
- Use of word processor

G&T Modifications

- - Alternate assignments/enrichment assignments
 - Enrichment projects
 - Extension activities
 - Higher-level cooperative learning activities
 - Pairing direct instruction with coaching to promote self-directed learning
 - Provide higher-order questioning and discussion opportunities
 - Provide texts at a higher reading level
 - Tiered assignments
 - Tiered centers

Benchmark Assessments

Skills-based assessment

Reading response

Writing prompt

Lab practical

Alternative Assessments

Performance tasks

Project-based assignments

Problem-based assignments

Presentations

Reflective pieces

Concept maps

Case-based scenarios

Portfolios

Formative Assessment

- Observations during in-class activities; of students' non-verbal feedback during lecture.
- Homework exercises as review for exams and class discussions.
- Reflections journals that are reviewed periodically during the semester.
- Question and answer sessions, formal—planned and informal—spontaneous.
- Conferences between the instructor and student at various points in the semester.
- In-class activities where students informally present their results.
- Student feedback collected by periodically answering specific question about the instruction and their self-evaluation of performance and progress.

Summative Assessment

- Quiz, Test, MP Assessments about the specified lesson: **Development-Intersections Drawings**
- Final examination (a truly summative assessment) about the specified lesson.
- Projects (project phases submitted at various completion points could be formatively assessed) about the specified lesson.
- Portfolio that include all class assignments.
- Student evaluation of the lesson (teaching effectiveness).
- Instructor self-evaluation about the current lesson
- By Rubric shown below.

Computer Aided Design Evaluation Rubric

Category	1 Does Not Meet Expectations (0-25% of points)	2 Attempted to Meet Expectations (25-50% of points)	3 Meets Expectations (50-75% of points)
Defining the Problem	Offers an unclear statement of the problem. There is no support, documentation, or need for development. Little or no work is evident.	A short description and explanation is offered to the problem without any support and specifications for development pursuits.	A good statement and support/documentation is given to suggest the need to develop the product. Design specifications and constraints are also noted.
Research, Brainstorming, and Developing Ideas	Little research and brainstorming accomplished. Ideas generated are not original.	Research is evident as an outcome of brainstorming. Ideas generated are a result of the brainstorming process and not original.	Ideas generated are new and original as an outcome of brainstorming and research. Little suggestions are offered for the rest of the design process if any.
Conceptual Design and Sketching	Only one sketch is offered for a design review.	At least two sketches are offered for a review. The sketches offer no design specifications or annotation.	More than two sketches are offered for a review. The sketches include design specifications and annotation for developing the design.

Category	1 Does Not Meet Expectations (0-25% of points)	2 Attempted to Meet Expectations (25-50% of points)	3 Meets Expectations (50-75% of points)
Developing the Design	A set of sketched working drawings without an assembly drawing. 3D representations of each part of the assembly on the working drawings are missing. Annotations, dimensioning and blocks are not accurate.	A set of production drawings with an assembly and working drawings. Each orthographic drawing includes a 3D representation. Annotations, notations, blocks, and dimensioning are inaccurate.	A set of production drawings with an assembly and working drawings. Multiview drawings are added additional to orthographic drawings. A 3D representation is included on all multiview drawings. Annotations, notations,

			blocks, and dimensioning are slightly inaccurate.
Making a Model or Prototype	Model is missing or does not look like concept sketches.	Model is proportional to sketches, inaccurate in scale, and dimensioning does not follow industry standards.	Model is accurate in proportion and dimensioning according to concept sketches and industry standards.
Engineering Testing and Evaluating the Design	Testing and evaluating designs/model are missing or not checked/approved.	Testing and verification attempted by checks and approvals without results.	Testing and verification are complete with checks/approvals and detailed results are not following industry standards.

Category	1 Did Not Meet Expectations (0-25% of points)	2 Attempted to Meet Expectations (25-50% of points)	3 Meets Expectations (50-75% of points)
Revising the Design	No attempt made to revise the design. Revision blocks not completed.	Designs revised without revision blocks completed.	Designs revised according to change requests and revision blocks filled out appropriately, but no approval or checking sought after the first revision.
Creating a Final Model, Prototype, or Mockup	Missing prototype model or mockup.	Mockup or prototype model is not accurate according to production drawings	Prototype model or mockup is accurate according to production drawing and created out of materials not specified.
Presentation	A presentation given without preparation and an outline.	A presentation given without a professional presence, good public speaking and a well thought out organized outline.	An organized outlined presentation with a professional presence, a written proposal, good public speaking and visual aids.
