Unit Overview:

Lifelong fitness is a term that identifies how a person chooses to remain in good health throughout their lifetime. In most cases, lifelong fitness is not recognized as one participating in an organized sport for the entirety of their lives, but more so engaging in a healthy, active lifestyle to benefit their years to come. This lifestyle can include a wide variety of activities such as jogging, dancing, walking, weight lifting, swimming, biking, etc. In this unit, students will engage in much self reflection in order to find the activities that best suit their needs and interests. The goal of this entire unit is for each student to find at least one activity that they enjoy, and that they can picture themselves engaging in for their years to come.

Essential Questions:

- What is lifelong fitness?
- How does lifelong fitness differ from fitness in general?
- What activities can fall into the category of lifelong fitness activities?
- What are the benefits of engaging in lifelong fitness?

Enduring Understandings:

- Lifelong fitness means making fitness a component or priority for the entirety of one's life.
