Unit 4 Geometry

Content Area:MathematicsCourse(s):English I, Honors Pre-Algebra 7, CCSS Math 7Time Period:MarchLength:1 Marking PeriodStatus:Published

Enduring Understandings

- Formulas can be determined and used to calculate the area of both regular and irregular shapes.
- 3D figures have unique characteristics and properties.
- Perimeter and area of 2D figures are useful when finding volume and surface area of 3D figures.

Essential Questions

- Can we determine is three side lengths would create a triangle?
- What is difference between area and perimeter?
- How are 3D figures different from 2D figures?
- What is a cross section of a figure and how will that help compute properties of the figure?
- How are surface area and volume found for a 3D figure?

MA.K-12.1	Make sense of problems and persevere in solving them.
MA.K-12.2	Reason abstractly and quantitatively.
MA.K-12.3	Construct viable arguments and critique the reasoning of others.
MA.K-12.4	Model with mathematics.
MA.K-12.5	Use appropriate tools strategically.
MA.K-12.6	Attend to precision.
MA.K-12.7	Look for and make use of structure.
MA.K-12.8	Look for and express regularity in repeated reasoning.
MA.7.G	Geometry
MA.7.G.A	Draw, construct, and describe geometrical figures and describe the relationships between them.
MA.7.G.A.1	Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.
MA.7.G.A.2	Draw (with technology, with ruler and protractor, as well as freehand) geometric shapes with given conditions. Focus on constructing triangles from three measures of angles or sides, noticing when the conditions determine a unique triangle, more than one triangle, or no triangle.

Standards/Indicators

Describe the two-dimensional figures that result from slicing three-dimensional figures, as in plane sections of right rectangular prisms and right rectangular pyramids.
Solve real-life and mathematical problems involving angle measure, area, surface area, and volume.
Know the formulas for the area and circumference of a circle and use them to solve problems; give an informal derivation of the relationship between the circumference and area of a circle.
Use facts about supplementary, complementary, vertical, and adjacent angles in a multi- step problem to write and solve simple equations for an unknown angle in a figure.
Solve real-world and mathematical problems involving area, volume and surface area of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right prisms.

Lesson Titles

- 3-D Figures
- Angles and Line Relationships
- Area of Circles
- Area of Composite Figures
- Area of Parallelograms, Triangles, and Trapezoids
- Circles and Circumference
- Congruent Triangles
- Polygons
- Quadrilaterals
- Similar Solids
- Surface Area of Prisms
- Triangles
- Volume of Cylinders
- Volume of Prisms
- Volume of Pyramids and Cones

21 Century Skills & Career Readiness Practice

CAEP.9.2.8.B	Career Exploration
CAEP.9.2.8.B.1	Research careers within the 16 Career Clusters $\ensuremath{^{\circledast}}$ and determine attributes of career success.
CAEP.9.2.8.B.2	Develop a Personalized Student Learning Plan with the assistance of an adult mentor that includes information about career areas of interest, goals and an educational plan.
CAEP.9.2.8.B.3	Evaluate communication, collaboration, and leadership skills that can be developed through school, home, work, and extracurricular activities for use in a career.
CAEP.9.2.8.B.4	Evaluate how traditional and nontraditional careers have evolved regionally, nationally, and globally.
CAEP.9.2.8.B.5	Analyze labor market trends using state and federal labor market information and other

	resources available online.
CAEP.9.2.8.B.6	Demonstrate understanding of the necessary preparation and legal requirements to enter the workforce.
CAEP.9.2.8.B.7	Evaluate the impact of online activities and social media on employer decisions.

LA.RL.7.4	Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.
SCI.7-8.5.1.8.B.2	Gather, evaluate, and represent evidence using scientific tools, technologies, and computational strategies.
SCI.7-8.5.1.8.B.b	Mathematics and technology are used to gather, analyze, and communicate results.
SCI.7-8.5.1.8.B.c	Carefully collected evidence is used to construct and defend arguments.
SCI.7-8.5.1.8.D.1	Engage in multiple forms of discussion in order to process, make sense of, and learn from others' ideas, observations, and experiences.

Instructional Strategies, Learning Activities, and Levels of Blooms/DOK

- Apply and justify the formulas for area with a partner.
- Blooms # 6 Evaluation Make and defend judgements based on internal evidence or external criteria
- Blooms #1 Knowledge Remember Previously learned information.
- Blooms #2 Comprehension Demonstrate an understanding of facts.

• Blooms #3- Application - Apply knowledge to actual situations

• Blooms #4 Analysis - Break down objects or ideas into simpler parts and find evidence to support generalizations.

- Blooms #5 Synthesis Compile component ideas into a new whole or propose alternative solutions.
- Complete worksheets on area and perimeter
- Examples of area and perimeter of trapezoids, triangles, rectangles, parallelograms.
- Graphing ordered pairs on a coordinate plane.
- Introduction, notes and examples on area and perimeter
- Introduction, notes, examples on finding the area of pointed figures (Cones and Pyramids).
- Introduction, notes, examples on finding the volume of a cube, rectangular prism, and triangular prisms.
- Introduction, notes, examples on Surface Area of a 3D figure
- Note cards on formulas for area and perimeter
- Notes and examples of area of irregular figures
- Notes and examples on finding the shaded area of a figure
- Review homework student work on board
- Students will work as a group or with a partner.
- Students will work independently.
- Worksheet on special pairs of triangles
- Worksheets with a partner on finding the area of irregular figures
- Worksheets with a partner on finding the shaded are of figure.

Modifications

ELL Modifications

Content specific vocabulary important for ELL students to understand include:

2-D Geometry

- Provide students pyramids and prisms with bases that are either a pentagon, hexagon, heptagon, octagon, nonagon, or decagon
- Discuss how to find the area of irregular figures that consist of circles or semi-circles
- Discuss how to find the two-dimensional figures formed by a diagonal slice of three-dimensional figure
- Investigate the angle relationships that are formed by two parallel lines and a transversal

3-D Geometry

- The volume of a solid represents how much substance a solid can hold. .
- Using a protractor will give you the specific number of degrees of a given angle. .
- These angles form a perfect "X" when put together. .
- Vertical angles are congruent to one another.

- Anticipate where needs will be
- Assign a peer to help keep student on task
- Break tests down in smaller increments
- Collaboration with ELL Teacher
- Graphic organizers
- Increase one-to-one time
- Modification plan
- Modifications & accommodations as listed in the student's IEP
- Modified or reduced assignments
- Position student near helping peer or have quick access to teacher
- Prioritize tasks
- Provide calculator to assist with calculations
- Provide graphic organizer for remembering angle relationships
- Provide guided notes and step-by-step instructions on solving equations
- Provide students with a formula sheet with one type of problem for each formula worked out for them already
- Provide worked out examples on classwork and homework that students can use as a guide when working independently
- Reduce length of assignment for different mode of delivery
- Strategy groups
- Teacher conferences
- Think in concrete terms and provide hands-on-tasks
- Use patterns that are easily discernible in function tables
- Working contract between you and student at risk

IEP & 504 Modifications

- Anticipate where needs will be
- Assign a peer to help keep student on task
- Break tests down in smaller increments
- Graphic organizer for remembering integer rules.
- Increase one-to-one time
- Modifications & accommodations as listed in the student's IEP
- Modified or reduced assignments
- Personal handout for remembering integer rules (can be taped to desk)
- · Position student near helping peer or have quick access to teacher
- Prioritize tasks
- Provide a calculator to help with calculations
- Provide example list of rational and irrational numbers
- Provide guided notes and step-by-step instructions on solving equations
- Provide personal handout for integer rules
- Provide student with a formula sheet with one type of problem for each formula worked out for them already.
- Provide worked out examples on classwork and homework that students can use as a guide when working independently
- Reduce length of assignment for different mode of delivery
- Think in concrete terms and provide hands-on-tasks
- Working contract between you and student at risk

G & T Modifications

- Discuss how to find the area of irregular figures that consist of circles or semi-circles
- Discuss how to find the two dimensional figures formed by a diagonal slice of three-dimensional figure
- Investigate the angle relationships that are formed by two parallel lines and a transversal
- Provide students pyramids and prisms with bases that are either a pentagon, hexagon, heptagon, octagon, nonagon or decagon
- The volume of a solid represents how much substance a solid can hold
- These angles form a perfect "X" when put together
- Using a protractor will give you the specific number of degrees of a given angle
- Vertical angles are congruent to one another.

Formative Assessment

Choral Responses

- Collaborative work
- Constructed Responses
- Crossmatics
- Exit Card Order of Operations
- Guided Practice
- Hand Signals
- Independent Practice
- PARCC Questions Area of Parallelograms, trapezoids, triangles and rectangles
- PARCC Questions Areas of Circles
- PARCC Questions circles and circumference
- PARCC Questions Surface Area
- PARCC Questions Volume of cones and pyramids
- PARCC Questions -Angle and line relationships
- PARCC Vocabulary
- Quiz Angle and Line Relationships
- Quiz Area of a circle
- Quiz Area of Triangles, Trapezoids, Parallelograms, and Rectangles.
- Quiz Circumference of a Circle
- Quiz Surface area
- Quiz volume of a rectangular prism
- Quiz volume of pointed figures
- Rubrics
- Self Assessments
- Senteo Response
- Teacher Observation
- Think Pair Share
- Turn to your partner

Summative Assessment

- Marking Period Assessment
- Mid Chapter Test on Angle and Line Relationships, and Area of Rectangles, triangles, trapezoids and Paralellograms
- Mid Chapter Tests on 3D figures, cross sections and volume of rectangular prisms.
- Project
- Test on 2-D Geometery
- Test on 3-D Geometery
- Unit Tests

Resources & Materials

- Calculators
- Chromebooks
- PMI practice questions online
- Senteo Response Questions
- Smartboard

Technology

- Answer Garden
- Calculator
- Chromebooks
- GoGaurdian
- Google Classroom
- Kahoot
- Khan Academy order of operations, integers, rational numbers
- PARCC Online Practice Assessment
- PMI Senteo Response
- Quizlet Volcabulary

Smartboard	
TECH.8.1.8.A.CS1	Understand and use technology systems.
TECH.8.1.8.A.CS2	Select and use applications effectively and productively.
TECH.8.1.8.C.CS1	Interact, collaborate, and publish with peers, experts, or others by employing a variety of digital environments and media.
TECH.8.1.8.D.CS1	Advocate and practice safe, legal, and responsible use of information and technology.
TECH.8.1.8.D.CS2	Demonstrate personal responsibility for lifelong learning.
TECH.8.1.8.D.CS3	Exhibit leadership for digital citizenship.
TECH.8.1.8.E.CS3	Evaluate and select information sources and digital tools based on the appropriateness for specific tasks.
