

Unit #2: The Number System

Content Area: **Mathematics**
Course(s): **English I**
Time Period: **November**
Length: **1**
Status: **Published**

Enduring Understandings

- Algebraic and numeric procedures are interconnected and build on one another to produce a coherent whole.
- Every number has a decimal expansion.
- Properties of operations with whole and rational numbers also apply to all real numbers.
- The value of any real number can be represented in relation to other real numbers such as with decimals converted to fractions, scientific notation and numbers written with exponents.

Essential Questions

- How is the universal nature of properties applied to real numbers?
- Why are quantities represented in multiple ways?

Standards/Indicators

MA.K-12.1	Make sense of problems and persevere in solving them.
MA.8.NS	The Number System
MA.8.NS.A	Know that there are numbers that are not rational, and approximate them by rational numbers.
MA.8.NS.A.1	Know that numbers that are not rational are called irrational. Understand informally that every number has a decimal expansion; for rational numbers show that the decimal expansion repeats eventually, and convert a decimal expansion which repeats eventually into a rational number.
MA.8.NS.A.2	Use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line diagram, and estimate the value of expressions (e.g., π^2).
MA.8.EE.A	Work with radicals and integer exponents.
MA.8.EE.A.2	Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational.
MA.8.EE.A.3	Use numbers expressed in the form of a single digit times an integer power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other.
MA.K-12.6	Attend to precision.
MA.K-12.7	Look for and make use of structure.
MA.8.EE.A.4	Perform operations with numbers expressed in scientific notation, including problems where both decimal and scientific notation are used. Use scientific notation and choose

units of appropriate size for measurements of very large or very small quantities (e.g., use millimeters per year for seafloor spreading). Interpret scientific notation that has been generated by technology.

MA.K-12.8

Look for and express regularity in repeated reasoning.

Lesson Titles

- Approximating Square Roots
- Classifying Numbers
- Operations with numbers in scientific notation
- Properties of integer exponents
- Repeating and Terminating Decimals
- Simplifying Expressions
- Writing numbers in scientific notation

21st Century Skills and Career Ready Practices

CAEP.9.2.8.B.1	Research careers within the 16 Career Clusters [®] and determine attributes of career success.
CAEP.9.2.8.B.2	Develop a Personalized Student Learning Plan with the assistance of an adult mentor that includes information about career areas of interest, goals and an educational plan.
CAEP.9.2.8.B.3	Evaluate communication, collaboration, and leadership skills that can be developed through school, home, work, and extracurricular activities for use in a career.
CAEP.9.2.8.B.4	Evaluate how traditional and nontraditional careers have evolved regionally, nationally, and globally.
CAEP.9.2.8.B.5	Analyze labor market trends using state and federal labor market information and other resources available online.
CAEP.9.2.8.B.6	Demonstrate understanding of the necessary preparation and legal requirements to enter the workforce.
CAEP.9.2.8.B.7	Evaluate the impact of online activities and social media on employer decisions.

Inter-Disciplinary Connections

- History - Evolution of Numbers
- LAL - Vocabulary
- Science - Expansion of Universe; Size of Universe
- Science - Look into Plant Cells

LA.L.8.4.D	Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
SCI.7-8.5.1.8.B	Students master the conceptual, mathematical, physical, and computational tools that need to be applied when constructing and evaluating claims.
SCI.7-8.5.3.8.A	Living organisms are composed of cellular units (structures) that carry out functions

required for life. Cellular units are composed of molecules, which also carry out biological functions.

SOC.6.1.8

U.S. History: America in the World: All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.

SOC.6.2.8

World History/Global Studies: All students will acquire the knowledge and skills to think analytically and systematically about how past interactions of people, cultures, and the environment affect issues across time and cultures. Such knowledge and skills enable students to make informed decisions as socially and ethically responsible world citizens in the 21st century.

Anticipatory Set

- Current Events
- Mathematics History
- Relate to prior knowledge
- Video clips

Instructional Strategies, Learning Activities, and Levels of Blooms/DOK

- SWBAT apply the properties of integer exponents to generate equivalent numerical expressions
- SWBAT choose appropriate units of measurements for a given number in scientific notation.
- SWBAT convert a decimal expansion which repeats eventually into a rational number.
- SWBAT distinguish between rational and irrational numbers.
- SWBAT estimate very large or very small quantities using a single digit times a power of ten.
- SWBAT express how much larger one number expressed as a single digit times a power of ten is than another in the context of the situation.
- SWBAT express numbers in scientific notation.
- SWBAT find rational approximations of irrational numbers.
- SWBAT interpret scientific notation that has been generated by technology.
- SWBAT multiply and divide monomials.
- SWBAT perform operations with numbers expressed in scientific notation and a mix of scientific notation and decimal notation.
- SWBAT use rational approximations of irrational numbers to compare the size of irrational numbers, locate them approximately on a number line, and estimate the value of expressions.

Modifications

ELL Modifications

Content specific:

vocabulary important for ELL students to understand include: Fraction, numerator/denominator, greatest/least, absolute value, signs, negative, opposite, improper fraction, mixed number, inverse

- Collaboration with ELL Teacher
- Frontload information in native language
- Graphic organizers
- Modification plan
- Strategy groups
- Teacher conferences
- Using videos, illustrations, pictures, and drawings to explain or clarification

IEP & 504 Modifications

- Anticipate where needs will be
- Assign a peer to help keep student on task
- Break tests down in smaller increments
- Graphic organizer for remembering integer rules.
- Increase one-to-one time
- Modifications & accommodations as listed in the student's IEP
- Modified or reduced assignments
- Personal handout for remembering integer rules (can be taped to desk).
- Position student near helping peer or have quick access to teacher
- Prioritize tasks
- Provide completed examples for practice work and homework.
- Reduce length of assignment for different mode of delivery
- Think in concrete terms and provide hands-on-tasks
- Working contract between you and student at risk

G&T Modifications

- Allow order of operation problems to contain multiple sets of parenthesis (including parenthesis inside of parenthesis).
- Evaluating expressions containing more rational numbers.
- Fraction/Decimal problems involving order of operations.

Formative Assessment

- Exit Question - Scientific Notation
- Exit Tickets - Classify numbers
- Graphic Organizer
- Group Work
- Guided Practice
- Hand Signals
- Independent Practice - Classify numbers
- Math Puzzles - Crossmatic
- Observation
- Open-ended question - order numbers
- Oral Questioning
- Quick Quizzes - previous day's lesson
- Quick quizzes -Cumulative Questions
- Senteo
- Think-Pair-Share
- Written Work

Summative Assessment

- K Chart: Scientific Notation
https://docs.google.com/document/d/12LkHRP5S53CayIzYrQgnGEAOU6IbCd8L_nuFxx7ncvA/edit
- Marking Period Assessment
- Project Based Assessment - Represent real world numbers in scientific notation
- Quiz - rational/irrational numbers
- Quiz - scientific notation
- Self-Assessment
- Test - Classifying and ordering numbers

Resources & Materials

- Glencoe Pre-Algebra - Chapter 5
- Number Lines

Technology

- Brain Pop - Scientific Notation <https://classroom.google.com/c/MTY4MDI5NzY0OFpa>
- Calculator
- estimate square roots <http://www.mathopolis.com/games/estimate-sqroot.php>

- SmartBoard

TECH.8.1.8 Educational Technology: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.

TECH.8.2.8 Technology Education, Engineering, Design, and Computational Thinking - Programming: All students will develop an understanding of the nature and impact of technology, engineering, technological design, computational thinking and the designed world as they relate to the individual, global society, and the environment.
