504 and IEP Accommodations & Modifications

Testing modifications:

- higher level reasoning questions such as, DBQs or RAFTs, would have less weight than other questions or possibly be provided as extra credit questions to provide exposure to these questions but not something that will be a detriment to the student's ability to share knowledge of content
- DBQs and RAFTs will include highlighted segments
- rewording questions so that there are not higher level vocabulary within the question (you are testing for understanding of the content not the ability to understand the question)
- less questions per page (so not visually overwhelming) divide matching into smaller sections or limit to

ten

- less none of the above, all of the above, which of the following apply, or which do not apply type questions (again it is testing for understanding of the question not the content) OR fewer options such as A - C only
- if not directly testing directly for reading comprehension offering paraphrasing of quotes, etc... if the student is expected to be testing on understanding that paragraph or quote to answer future questions. Use with historical documents.
- word banks, multiple choice, matching questions help when possible
- less questions overall if the student takes so much extra time that they are going into future days (then missing instruction) to take the test
- allowing student to correct mistakes or answer wrong questions correctly for additional credit if failed the first test (another way to re-teach material)
- Political cartoons and other images/graphics should include a synopsis
- Maps with keys/ word banks
- Current events can be watched or read
- Test in small groups
- Projects can be submitted digitally or paper
- Options for type of project relating to content

Instructional modifications/accommodations:

- teaching the main ideas/concepts (limiting not needed details) to be taught and repeating them in several different ways over several different days (goal is 7 different ways same concept for students with learning disabilities)
- providing students with content vocabulary prior to teaching a lesson including that vocabulary (pre-teaching) Varied instruction: Quizlet
- providing study guides that don't lead the student to study too much extraneous information (less unnecessary details)/scaffolded study guides. Completed study guides can be offered by teacher. Digital review such as kahoots can also be used.
- scaffolded notes
- allowing student to take notes in class for reinforcement but also providing a copy (digital or print) of completed/correct notes to study from
- modeling and showing lots of examples
- allowing co-teaching with general education and special education teachers/aides in the same classroom so that the special education teacher can re-teach students with special needs in a different way in a smaller group (pulled to the side)
- if not in a co-teaching setting allowing time in the schedule for a special education teacher to consult with general education teachers on what specifically can be modified or how to paraphrase things in a different way specific to that lesson
- direct teaching and/or assistance for organization, social skills/peer interactions
- providing paraphrased or modified reading materials at the student's reading level for science and social studies and elective classes
- speaking to students privately when redirecting behaviors
- reducing homework length to just those most important for review
- allow student to edit with teacher comments the first attempt at a graded written assignment
- breaking larger assignments/projects into shorter tasks with clear deadlines for each section
- monitoring student moods/behavior fluctuation patterns to report to case manager
- Students who prefer to work individually will be permitted to
- Oral presentations to small groups or teacher only

- Preferential Seating
- Use manipulatives where possible
- Use visuals
- Use graphic organizer

- Employ differentiated curriculum to keep interest high.
- Repetition of key concepts through varied methods
- Ask students' higher level questions that require students to look into causes, experiences, and facts to draw a conclusion or make connections to other areas of learning. Encourage students to make connections through historical time periods/linkage.
- Encourage students to make transformations- use a common task or item in a different way.
- Different test items. (DBQ, RAFT, thesis statement, projects, inquiry based)
- Effective questioning techniques (focus on what's important, provide processing time, require higher order thinking
