Linden Public Schools Vision

The Linden Public School District is committed to developing respect for diversity, excellence in education, and a commitment to service, in order to promote global citizenship and ensure personal success for all students

Linden Public Schools Mission

The mission of the Linden Public School District is to promote distinction through the infinite resource that is Linden's diversity, combined with our profound commitment to instructional excellence, so that each and every student achieves their maximum potential in an engaging, inspiring, and challenging learning environment.

Fine & Performing Arts Department Philosophy

We in the Linden Public Schools believe that the basic purpose of fine and performing arts education K to12 is to develop and nurture the students' skills as performers, creators, organizers, observers and evaluators. Our program is the study of the wide-range of disciplines that contain band, choir, dance, drama, musical theatre, orchestra, and visual art as well as, appropriate content from the humanities and the sciences.

We believe and accept the idea that the study of the fine and performing arts:

- Cultivates the whole person, engaging the mind, body and spirit.
- Builds many kinds of literacy while developing intuition, reasoning, dexterity and imagination.
- Invites multiple ways of knowing which actively engage the brain learning.
- Fosters unique, vital forms of communication, bringing excitement and exhilaration to the learning process.
- Embraces ambiguity-encouraging students to wonder and question.
- Develops both individual initiative and collective responsibility.
- Connects cultures and generations, past and present.
- Integrates the arts into other subjects as well as incorporating mathematics, language arts, history, and science into the fine & performing arts curriculum.
- Has commonalities but must also be respected as a distinct discipline.

We believe the primary goal of our fine & performing arts program will allow young people to nurture a positive self-image by developing self-awareness and self-discipline. We believe the teaching of art & music in the Linden Public Schools encourages students to be fluent in thought, flexible in acceptance, sensitive to feeling, creative in experimentation, aware of moral attitudes, inventive in their work, imaginative in creation, poised in presentation, cooperative in social interactions and appreciative of the work of others.

Fine & Performing Arts Department Goals

It is the goal of the music department to give the students of Linden Public Schools an opportunity to investigate the diverse areas in music open to them and let them choose and explore those to their liking. It is our desire that the students will gain a background in the basics of music. They will develop an appreciation of music and enrich the quality of their lives now and in the future. This revised K-8 music curriculum includes the six elements of music: rhythm, melody, harmony, tone color, form and expression. Originality, creativity and self-expression are stressed throughout each lesson taught. A scope, and sequence is evident in this curriculum, as well as an understanding of the student's growth and development in music.

Additional goals will:

1. Provide the opportunity for students to develop skills to express feelings and ideas through music production.
2. Present the music program as a creative challenge to all students providing for skill development in the area of critical thinking and problem solving.
3. Give students an opportunity to explore music in the context of personal interests and aptitude including the development of communication skills both verbal and written.
4. Encourage students to achieve an appreciation of music, which will assist them in understanding its use and value historically and culturally.
5. Reinforce the interconnectedness between the study of art, music, mathematics, history, creative writing and literature.
6. Develop student awareness of the relationship of music with important aspects of daily living including its necessary functions for various career pursuits.
7. Provide the opportunity for visibility of the school music program via students' concerts as both a reflection of student achievement and a vehicle to communicate the value of music education to the community.

I. Course Descriptions:

Introduction to Guitar:

The primary goal of the Introduction Guitar course is expose new students (Grades 9-12) to the instrumental string program in the Linden Public School system; furthermore, it will also serve to enhance the musical development of students who have already started in the instrumental music program. The initial elements of music theory, harmony, and ear training will be learned as students take their first steps towards learning the study and performance of the guitar. Students are expected to be fully engaged in all class activities for optimal success.

Advanced Guitar Workshop:

The Advanced Guitar Workshop is a continuation of the studies learned in Introduction to Guitar. Students continue learning more music reading skills and developing aesthetic awareness through listening to, and analyzing, music of varied historical periods and critiquing the performance of themselves and others. The more advanced elements of music theory, harmony, and ear training will be learned as students take their first steps towards learning the study and performance of the guitar. This is inclusive of rhythmic, harmonic, and melodic dictation. Students will utilize these skills in a creative capacity to compose, and make transcriptions of, music and improvise over harmonic changes in both the classical and jazz genres. This course is designed as a preparatory course for performances in concerts and school functions. This course will prepare students for a career in music after graduation through the study of high-level guitar repertoire. This course is for those, but not strictly limited, to those who have taken Introduction to Guitar. Students with prior experience in instrumental music at the middle school or high school levels may meet the criteria to take this course: Teacher approval is required to register for this course.

In guitar classes, students use visual aids or read lyrics which associates to language arts classes. Students use math through counting, adding, and subdividing beats as they learn to ready rhythms. Additionally, classes relate to social studies through the connection of music to various regions of the world and time periods/genres from which they derive. Finally, guitar classes connect to science through the explanation of how waves create sound.
