Horizontal Integration- Interdisciplinary Connections

Science: Life Cycle (Connecting Text to World)

Think about real tadpoles and how they change into frogs. In pairs or small groups, choose another animal to research, write a sentence about the animal, draw a diagram, and present it to the class to explain changes

Arts: Illustration

Students will create a comic strip (3 boxes – beginning, middle, end) for both Yeh-Shen and Cinderella that illustrate the differences and similarities between the two fairy tales.

MU.K-2.1.3A.2.Pr5e	Demonstrate understanding of basic expressive qualities (e.g., dynamics, tempo) and how creators use them to convey expressive intent.
2-LS2-2.2	Developing and Using Models
2-LS4-1	Make observations of plants and animals to compare the diversity of life in different habitats.

Vertical Integration- Discipline Mapping

The curriculum map in Grades 1 – 5 focus on several domains that are developed and reviewed across units. Life science, community, social relationships, cultures and are all domains that are spiraled across the grades.

- In life science students explore animals by learning about how they communicate, their traits, habitats, life cycles and behaviors.
- Students will learn the functional processes of a community including community types, and active membership.
- Students will explore social relationships. They will find out what is important about being a friend, become aware of their feelings and emotions, gain appreciation for differences and unique characteristics of others.
- Cultural awareness is heightened through developing in-depth knowledge of history, traditional stories, historical figures and documents, and traditions.
- American History is presented through texts that include the settling and agricultural challenges faced in the west by pioneers, character traits of successful leaders and inventors, and the opinions that led to the fight for freedom and development of the American government.
