Horizontal Integration- Interdisciplinary Connections

Social Studies: Communication

Students will write a letter to a friend or family member who live in a different city or town. Students might write about what they learned from "Moving the U.S. Mail." Students will share letters with the class and display a United States map and world map to locate the destination of their letters.

Social Studies: American History (Pioneer Life)

Describe physical features of the United States. Use text evidence to highlight problems that physical features might have caused for pioneers traveling in wagons.

SOC.6.1.5.GeoPP.1	Compare and contrast characteristics of regions in the United States based on culture, economics, and physical characteristics to understand the concept of regionalism.
SOC.6.1.5.GeoPP.3	Use geographic models to describe how human movement relates to the location of natural resources and sometimes results in conflict.
SOC.6.1.5.GeoPP.6	Compare and contrast the voluntary and involuntary migratory experiences of different groups of people and explain why their experiences differed.

Vertical Integration- Discipline Mapping

The curriculum map in Grades 1 – 5 focus on several domains that are developed and reviewed across units. Life science, community, social relationships, cultures and are all domains that are spiraled across the grades.

- In life science students explore animals by learning about how they communicate, their traits, habitats, life cycles and behaviors.
- Students will learn the functional processes of a community including community types, and active membership.
- Students will explore social relationships. They will find out what is important about being a friend, become aware of their feelings and emotions, gain appreciation for differences and unique characteristics of others.
- Cultural awareness is heightened through developing in-depth knowledge of history, traditional stories, historical figures and documents, and traditions.
- American History is presented through texts that include the settling and agricultural challenges faced in the west by pioneers, character traits of successful leaders and inventors, and the opinions that led to the fight for freedom and development of the American government.
