

# Unit 3 : Humans and the Environment

Content Area: **Science**  
 Course(s): **Environmental & Earth Science**  
 Time Period: **Second Marking period**  
 Length: **7 Week**  
 Status: **Published**

## Unit Overview

---

Unit three focuses on human population and its continuous interaction with the environment. It addresses the ongoing growth of the human population and raises concerns about approaching carrying capacity. Unit three also addresses, in details, the human impact on the environment throughout managing natural resources and using alternative techniques to harvest more resources sustainably. The last topic of the unit, urbanization, addresses both the exponential growth and the logistic growth of the human population in the past 100 years.

## STAGE 1- DESIRED RESULTS

---

### Standards- 2020 New Jersey Student Learning Standards- Science

---

SCI.9-12.HS-ESS3-1	Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.
SCI.9-12.HS-LS4-2	Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment.
SCI.9-12.HS-LS4-3	Apply concepts of statistics and probability to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait.
SCI.9-12.HS-ESS3-2	Evaluate competing design solutions for developing, managing, and utilizing energy and mineral resources based on cost-benefit ratios.
SCI.9-12.HS-ESS3-3	Create a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity.
SCI.9-12.HS-ESS3-4	Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.
SCI.9-12.HS-ETS1-3	Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.

## Science and Engineering Practices

---

- Analyzing and Interpreting Data
- Asking Questions and Defining Problems
- Constructing Explanations and Designing Solutions
- Developing and Using Models
- Engaging in Argument from Evidence
- Obtaining, Evaluating, and Communicating Information
- Planning and Carrying Out Information
- Using Mathematics and Computational Thinking

## Cross Cutting Concepts

---

- Cause and Effect
- Energy and Matter
- Influence of Engineering, Technology, and Science on Society and the Natural World
- Interdependence of Science, Engineering, and Technology
- Patterns
- Scale, Proportion, and Quantity
- Stability and Change
- Structure and Functions
- Systems and System Models

## Disciplinary Core Ideas

---

## Physical Sciences

---

- PS1A: Structure and Properties of Matter
- PS1B: Chemical Reactions
- PS1C: Nuclear Processes
- PS2A: Forces and Motion
- PS2B: Types of Interaction
- PS3A: Definitions of Energy
- PS3B: Conservation of Energy and Energy Transfer
- PS3C: Relationship Between Energy and Forces
- PS3D: Energy in Chemical Processes and Everyday Life

- PS4A: Wave Properties
- PS4B: Electromagnetic Radiation
- PS4C: Information Technologies and Instrumentation

## **Life Sciences**

---

- LS1A: Structure and Functions
- LS1B: Growth and Development of Organisms
- LS1C: Organization for Matter and Energy Flow in Organisms
- LS1D: Information Processing
- LS2A: Interdependent Relationships in Ecosystems
- LS2B: Cycles of Matter and Energy Transfer in Ecosystems
- LS2C: Ecosystems Dynamics, Functioning, and Resilience
- LS2D: Social Interactions and Group Behavior
- LS3A: Inheritance of Traits
- LS3B: Variation of traits
- LS4A: Evidence of Common Ancestry and Diversity
- LS4B: Natural Selection
- LS4C: Adaptation
- LS4D: Biodiversity and Humans

## **Earth and Space Sciences**

---

- ESS1A: The Universe and its Stars
- ESS1B: Earth and the Solar System
- ESS1C: The History of Planet Earth
- ESS2A: Earth Materials and Systems
- ESS2B: Plate Tectonics and Large-Scale Systems
- ESS2C: The Role of Water in Earth's Surface Processes
- ESS2D: Weather and Climate
- ESS2E: Biogeology
- ESS3A: Natural Resources
- ESS3B: Natural Hazards
- ESS3C: Human Impacts on Earth Systems
- ESS3D: Global Climate Change

## **Engineering. Technology. and Applications of Science**

---

- ETS1A: Defining and Delimiting an Engineering Problem
- ETS1B: Developing Possible Solutions
- ETS1C: Optimizing the Design Solution

## Essential Questions

---

- How does the human population affect the environment?
- Why do we study human populations?
- How might the human population growth rate change in the future?
- What factors influence the impact a population has on its environment?
- What is environmental health?
- What is the relationship between the environmental health and our own health?
- How do biological and social factors in the environment affect human health?
- How do chemicals in our environment affect our health?
- How can we balance our needs for housing and jobs with the needs of the environment?
- How do we use the land we live on?
- How can the effects of urbanization lead to sprawl?
- What are the characteristics of a sustainable city?

Standards	Students will know	Students will do	Suggested Activities/ Strategies
HS-LS4-3	<ul style="list-style-type: none"> <li>Technological advances, especially in agriculture and industry, changed the ways people lived and triggered remarkable increases in population size.</li> </ul>	<ul style="list-style-type: none"> <li>Describe how technological advances have contributed to human population growth.</li> </ul>	<ul style="list-style-type: none"> <li>Video: Agriculture and Industrial Revolution.</li> </ul>
HS-LS4-3	<ul style="list-style-type: none"> <li>In recent years the human population growth rate has decreased, but the population still continues to grow.</li> </ul>	<ul style="list-style-type: none"> <li>Explain recent trends in population growth.</li> </ul>	<ul style="list-style-type: none"> <li>Real Data: Population Growth Rate, (<i>Pearson Environmental Science: Your World, Your Turn</i>, 2011, p.230).</li> </ul>
HS-LS4-3	<ul style="list-style-type: none"> <li>Demographers study the size, density, and distribution of human populations.</li> </ul>	<ul style="list-style-type: none"> <li>Identify characteristics of human populations that are studied by demographers.</li> </ul>	<ul style="list-style-type: none"> <li>Explore human population densities throughout the world.</li> <li>Connect population distribution to available resources.</li> </ul>
HS-LS4-3	<ul style="list-style-type: none"> <li>Fertility rate helps demographers predict the rates at which populations will grow in the future.</li> </ul>	<ul style="list-style-type: none"> <li>Describe total fertility rates and replacement fertility.</li> </ul>	<ul style="list-style-type: none"> <li>Students to explore the work of demographers.</li> <li>Figure 8: Trend in China's Population: (<i>Pearson Environmental Science: Your World, Your Turn</i>, 2011, p.235).</li> </ul>

HS-ESS3-4	<ul style="list-style-type: none"> <li>There has been promising progress toward urban sustainability.</li> </ul>	<ul style="list-style-type: none"> <li>Discuss the progress toward sustainability some cities have made and its importance to the world.</li> </ul>	<ul style="list-style-type: none"> <li>Case Study: The Urban Sustainability of Curitiba Brazil vs. NY City.</li> </ul>

### Predictable Misconceptions

- Developing countries must go through the same processes, steps, or trends that developed countries have gone through.
- Population problems of developing countries are not a problem for the United States.
- The world's worst population problem is found in developing countries.
- The notion that all growth is good.
- In U.S., cancer rates are soaring.
- Changing environmental laws and regulation is an effective way to improve public health.
- Developed countries are not responsible for the majority of Earth's population.
- Urbanization is inherently bad.
- Most urban growth occurs in mega-cities.
- Urban growth comes mainly from migration to cities.
- Rural-Urban migration can and should be stopped.
- The poor are a marginal minority in cities.
- Cities occupy a huge amount of land area.
- Urbanization inevitably harms the environment.

### Modification

- IEP guideline and modification for classified students.
- Extended time for struggling students.
- When available, assignments are to be sent electronically to online accounts and MacBook Air.
- Special accommodations for students with physical or visual impairments.
- Differentiated instruction.

### Suggested Case Studies

- Love Canal: Poisoned Promises.
- Saving the Siberian Tigers.
- China's One Child Policy.
- The Rise and Fall--and Rise? ---of DDT
- Growing Pains in Portland, Oregon.

### Enduring Understanding

---

- Humans affect the global environment more than any other species alive today.
- Human activity has changed the Earth's biomes and threatens biodiversity.
- Humans have developed adaptations that allow them to live on every continent of the world.
- The major five types of infectious diseases are: respiratory infections, AIDS, diarrheal diseases, tuberculosis, and malaria.
- Chemicals are all around us, and all of them can be harmful to our health in large enough amounts.
- Although we cannot prevent most natural disasters, there are steps that scientists, engineers, governments, and citizens can take to resist damage and deal with the aftermath.

### Students will be able to...

---

### STAGE 2- EVIDENCE OF LEARNING

---

### Formative Assessment

---

- Analogy Prompt
- Debriefing
- Exit Card / Ticket
- Hand Signals
- Index Card Summaries
- Journal Entry

- Misconception Check
- Observation
- Portfolio Check
- Questions & Answers
- Quiz
- Self-Assessment
- Web or Concept Map

### **Authentic Assessments**

---

- Chapter 8 Assessment, (*Pearson Environmental Science: Your World, Your Turn*, 2011, p. 251-252).
- Chapter 9 Assessment, (*Pearson Environmental Science: Your World, Your Turn*, 2011, p.287-288).
- Chapter 10 Assessment, (*Pearson Environmental Science: Your World, Your Turn*, 2011, p.318-319).
- E-Text: Chapter 8, 9, 6,10 Tests A, B.
- E-Text: Unit 3 Review and Assessment.
- Teacher-prepared Case Study Project Assessment.
- Students Workbook: Chapter 8, 9, 10, (*Pearson Environmental Science: Your World, Your Turn*, 2011, p.131: 182).

### **Benchmark Assessments**

---

- Unit One: Final Test
- Unit One: Project Assessment
- Final Exam

### **STAGE 3- LEARNING PLAN**

---

### **Instructional Map**

---

Unit	Time Frame	Date	Marking Period
3	<b>7 Weeks:</b> <ul style="list-style-type: none"> <li>• 5 Weeks Instruction</li> <li>• 2 Weeks Formative and Summative Assessment</li> </ul>	January and February	2 <sup>nd</sup> and 3 <sup>rd</sup>

- Assess students' prior knowledge of the related topics in the unit, (Pre-Assessment).
- Unit Case Study:
  - Preview the case study.
  - Read the case study.
  - Assimilate the facts.
  - Gather additional information.
  - Map the contents.
  - Make local connection.
  - Create a project.
- Teacher to use formative assessment and feedback to improve students' learning.
- Students to use the textbook, or E-text, for reading and definitions.
- Teacher to use PowerPoint and multi-sensory media to introduce concepts and main points.
- Teacher to use the suggested activities, in the table above, for teaching each concept in the unit.
- Students to connect and relate unit topics to their local communities and environment, when possible.
- Students to use study guides, homework, and students' workbook for reference and feedback.
- Apply labs and outside activities as indicated in the table above.
- Teacher to guide students through authentic resources during their conduction of research and inquiries.
- Students to use graphs, charts, data table, and maps throughout the unit as indicated in the table above.
- At the end of the unit, students should present scientifically sound projects supported by evidence, data, charts, and maps.
- Unit summative assessment.

## **Modification/Differentiation of Instruction**

### Differentiation Strategies for Special Education Students

- Remove unnecessary material, words, etc., that can distract from the content
- Use of off-grade level materials
- Provide appropriate scaffolding
- Limit the number of steps required for completion
- Time allowed
- Level of independence required
- Tiered centers, assignments, lessons, or products
- Provide appropriate leveled reading materials
- Deliver the content in "chunks"

- Varied texts and supplementary materials
- Use technology, if available and appropriate
- Varied homework and products
- Varied questioning strategies
- Provide background knowledge
- Define key vocabulary, multiple-meaning words, and figurative language.
- Use audio and visual supports, if available and appropriate
- Provide multiple learning opportunities to reinforce key concepts and vocabulary
- Meet with small groups to reteach idea/skill
- Provide cross-content application of concepts
- Ability to work at their own pace
- Present ideas using auditory, visual, kinesthetic, & tactile means
- Provide graphic organizers and/or highlighted materials
- Strategy and flexible groups based on formative assessment
- Differentiated checklists and rubrics, if available and appropriate

#### Differentiation Strategies for Gifted and Talented Students

- Increase the level of complexity
- Decrease scaffolding
- Variety of finished products
- Allow for greater independence
- Learning stations, interest groups
- Varied texts and supplementary materials
- Use of technology
- Flexibility in assignments
- Varied questioning strategies
- Encourage research
- Strategy and flexible groups based on formative assessment or student choice
- Acceleration within a unit of study
- Exposure to more advanced or complex concepts, abstractions, and materials
- Encourage students to move through content areas at their own pace
- After mastery of a unit, provide students with more advanced learning activities, not more of the same activity
- Present information using a thematic, broad-based, and integrative content, rather than just single-subject areas

#### Differentiated Strategies for ELL Students

- Remove unnecessary materials, words, etc., that can distract from the content
- Provide appropriate scaffolding

- Limit the number of steps required for completion
- Gradually increase the level of independence required
- Tiered centers, assignments, lessons, or products
- Provide appropriate leveled reading materials
- Deliver the content in “chunks”
- Varied texts and supplementary materials, including visuals
- Use technology, if available and appropriate
- Differentiate homework and products
- Varied questioning strategies
- Provide background knowledge
- Define key vocabulary, multiple-meaning words, and figurative language.
- Use audio and visual supports, if available and appropriate
- Provide multiple learning opportunities to reinforce key concepts and vocabulary
- Meet with small groups to reteach idea/skill
- Provide cross-content application of concepts
- Allow students to work at their own pace
- Presenting ideas through auditory, visual, kinesthetic, & tactile means
- Role play
- Provide graphic organizers, highlighted materials
- Strategy and flexible groups based on formative assessment

#### Differentiation Strategies for At Risk Students

- Remove unnecessary materials, words, etc., that can distract from the content
- Provide appropriate scaffolding
- Limit the number of steps required for completion
- Gradually increase the level of independence required
- Tiered centers, assignments, lessons, or products
- Provide appropriate leveled reading materials
- Deliver the content in “chunks”
- Varied texts and supplementary materials
- Use technology, if available and appropriate
- Differentiate homework and products
- Varied questioning strategies
- Provide background knowledge
- Define key vocabulary, multiple-meaning words, and figurative language
- Use audio and visual supports, if available and appropriate
- Provide multiple learning opportunities to reinforce key concepts and vocabulary
- Meet with small groups to reteach idea/skill
- Provide cross-content application of concepts
- Presenting ideas through auditory, visual, kinesthetic, & tactile means
- Provide graphic organizers and/or highlighted materials
- Strategy and flexible groups based on formative assessment

## 504 Plans

Students can qualify for 504 plans if they have physical or mental impairments that affect or limit any of their abilities to:

- walk, breathe, eat, or sleep
- communicate, see, hear, or speak
- read, concentrate, think, or learn
- stand, bend, lift, or work

Examples of accommodations in 504 plans include:

- preferential seating
- extended time on tests and assignments
- reduced homework or classwork
- verbal, visual, or technology aids
- modified textbooks or audio-video materials
- behavior management support
- adjusted class schedules or grading
- verbal testing
- excused lateness, absence, or missed classwork
- pre-approved nurse's office visits and accompaniment to visits
- occupational or physical therapy

## Modification Strategies

---

- Cooperative Grouping
- Extended Time
- Frequent Breaks
- Interactive Notebook
- Modified Test
- Oral Directions
- Repeated Drill and Practice
- Shortened Assignment
- Teacher Notes

- Use of Additional Reference Materials
- Use of Audio Resources

## **Horizontal Intergration- Interdisciplinary Connections**

---

See Appendix

## **Vertical Integration- Discipline Mapping**

---

- **Middle School**

- 6<sup>th</sup> Grade: Diversity of Life and Weather and Water
- 7<sup>th</sup> Grade: Populations and Ecosystems and Planetary Science
- 8<sup>th</sup> Grade: Earth History, Human Systems Interactions, and Heredity and Adaptations

- **High School**

- Biology
- Anatomy and Physiology
- Chemistry
- Physics
- Forensic Science
- Zoology
- Human Impact on the Environment
