The America of the 1960s and 1970s was a different country than the America of the 1950s. Deep cultural shifts marked this period of great change. The counterculture of the 1960s posed a fundamental challenge to traditional values and customs, and the women's rights movements brought gender disparities to the forefront of American consciousness. Even the people's relationship with the nation's landscape and resources was brought into question, as the environmental movement emerged. The Nixon presidency, called a "long national nightmare", by his successor, Ford, was followed by the difficulties of the Carter administration.
