Content Area: **Social Studies**  
Course(s):  
Time Period: **March**  
Length: **4 weeks**  
Status: **Published**

## **Enduring Understandings**

---

Scholarly works convey ideas and opinions and demonstrate reasoning skills that support their claims.

Authors and scholars deliberately engage with evidence to support their claims and argument.

Responsible researchers must accurately present their thesis, claims, and evidence in an organized and logical manner.

The researcher must be comfortable and familiar with the chosen medium and be sure to include all elements necessary to present the whole picture from problem to solution.

## **Essential Questions**

---

How do I connect all of the information and present it in an orderly manner?

How do I successfully present my solution with valid and ample evidence in support of my conclusion?

Have I omitted any major component of the problem or solution?

What is the best manner in which to present all of my findings?

## **Content**

---

Organize and present the problem, all research performed and the solution in one of the following formats:

**Documentary:** A documentary should reflect your ability to use audiovisual equipment to communicate your topic's significance. The documentary category will help you develop skills in using photographs, film, video, audio, computers, and graphic presentations. Your presentation should include primary source materials and also must be an original production. To produce a documentary, you must have access to equipment and be able to operate it

**Exhibit:** An exhibit is a visual representation of your research and interpretation of your topic's significance in history. The analysis and interpretation of your topic must be clear and evident to the viewer. Labels and captions should be used creatively with visual images and objects to enhance the message of your exhibit

**Paper:** A paper is the traditional form of presenting historical research. Various types of creative writing (for example, fictional diaries, poems, etc.) are permitted, but must conform to all general and category rules. Your paper should be grammatically correct and well written

**Website:** The website category is the most interactive of all NHD categories. A website should reflect your ability to use website design software and computer technology to communicate your topic's significance in history. Your historical website should be a collection of web pages, interconnected by hyperlinks, that presents both primary and secondary sources and your historical analysis. To engage and inform viewers, your website should incorporate interactive multimedia, text, non-textual descriptions (e.g., photographs, maps, music, etc.), and interpretations of sources. To construct a website, you must have access to the Internet and be able to operate appropriate software and equipment
