Transfer

Human Growth and Development

Enduring Understandings

Regular medical check-ups are essential to long term care of all body systems, including the Endocrine System and Reproductive Systems.

Decisions you make concerning your sexual activity now and in the near future can have lifetime consequences.

A pregnant person must take responsibility for proper prenatal care and refrain from using drugs, alcohol, and tobacco products.

By understanding that every individual has different boundaries, we can identify our own boundaries and when they are crossed.

By acquiring knowledge about sexual assault, we can recognize when someone's boundaries are being violated.

By understanding that content posted on the internet, including text messages and social media, can become public, it will help us take less risks and make better decisions about the information we share on the internet.

Essential Questions

Should a pregnant woman be held responsible if her child is born with effects from her drinking, smoking, or drug use?

Should parents be the only ones to give students information about Human Growth and Development?

Where might I go to get accurate information concerning Human Growth and Development?

Why is it important to communicate personal boundaries and show respect for the boundaries of others?

Why is a person who has been raped or sexually assaulted not at fault?

Why is it important to not share information or pictures via text message or social media that you consider private or personal?

Content

Endocrine System, pituitary gland, ovaries, testes fertilization ,hormones, thyroid, fallopian tubes, embryo, fetus, amniotic fluid , gene, chromosome, Mitosis, Consent, Sexual Abuse, Sexting

Learning Objectives

Describe how the Endocrine System supports people's bodies as they grow and develop.

Recognize the different parts and functions of the Endocrine System

Describe where and how fertilization takes place in the female reproductive system.

Identify the parts and functions of both the male and female reproductive system.

Explain the difference between embryo and fetus. Recognize the stages of the developing fetus.

Describe the influences of both heredity and environment on early development.

Explain the building of body systems. Cells to tissue, to organs, to systems.

Recognize how physical traits are inherited. Discuss chromosomes, genes, gender determination, etc.

Demonstrate effective ways to communicate personal boundaries and show respect for the boundaries of others.

Explain that no one has the right to touch anyone else in a sexual manner if they do not want to be touched.

Understand how to avoid digital risks from peers, themselves, and others.

Resources
