First Aid and Safety

Enduring Understandings

By acquiring health information about first aid we will gain the necessary skills to respond in an emergency situation.

By understanding the causes and frequency of accidents we will be empowered to make smarter decisions to maintain our own wellness and safety.

By understanding that everyone has their own “baggage,” it will help us show empathy for our peers that might be experiencing pain below their “water line.”

Essential Questions

What is harm or loss and how can we prevent it?

What influences do our friends and family have on our well being?

Why is immediate response to an emergency so important for a person’s chance of survival during a life-threatening emergency situation?

How can one determine that an emergency is occurring?

Why is it beneficial to know basic first aid?

Why is it important to show empathy and put yourself in someone else's shoes in certain situations?

What are some warning signs to look for if you think a friend might be in trouble or suicidal?

Content

CPR, rescue breathing, abrasion, contusion, laceration, puncture, avulsion, shock, Mental Health

Learning Objectives

Investigate causes of intentional and unintentional injuries in the United States.

Determine factors that could increase or decrease one's chance of harm.

Compare and contrast ways to protect oneself from disease/harm while providing care to an injured individual.

List steps necessary to perform rescue breathing and CPR.

Demonstrate ABC's of first aid and steps for rescue breathing.

Discuss when to call for care first and when to provide care first in emergency situations.

Understand and verbalize when a situation is considered to be life threatening and what necessary steps should be taken immediately to increase victim's chance of survival

Understand the importance of mental and emotional health.

Analyze the warning signs that a friend might be going through a tough situation.

Identify trusted adults that you can turn to if a friend is in trouble.
