# **Unit 9: Coding in the Wild**

Content Area: **Technology** 

Course(s): Time Period:

Marking Period 4

Length: Status: 10 blocks Published

# **Course Description & Instructional Notes**

# **Course Description**

Students learn coding as it relates to music, art, games, and sports.

# **Prior Knowledge:**

Retained knowledge from previous units

#### **Instructional Notes:**

This unit is mostly student-driven. Students are given four fields to explore coding further: sports, art, music, and game design. Teachers are expected to have less-structured lessons during this unit, instead promoting peer cooperation and freedom for students to design solutions to given problems. Teachers are expected to act more as a facilitator and guide students through the problem solving process as they tackle unusual or unexpected coding challenges. This unit is a good medium for teaching design thinking and collaboration.

#### **Technology Integration:**

Computer Science naturally integrates technology on a daily basis.

# **Enduring Understandings**

Computer science is a field with far-reaching applications, including those fields outside of science, technology, math, and engineering.

Incorporating multiple perspectives through collaboration improves computing innovations as they are developed.

# **Essential Questions**

How does coding apply to fields outside of computer science?

How does working collaboratively with others improve an overall project?

# **Student Learning Objectives**

Students will be able to:

- Explore unusual applications of computer science, such as in sports, art, and music.
- Design and implement a program that might solve a problem, enable innovation, explore personal interests, or express creativity, either individually or in small groups.
- Present their program to an audience.

# **Vocabulary & Learning Experiences**

# **Essential Academic Vocabulary**

Loop, Condition, Break Down (Decompose), Constant, Magic Number, Programming Style, Top Down Design, Canvas, Counter, Return, Global Variable, Local Variable, Timer, Event, Precondition, Postcondition, Coordinate system, Randomize, Return Value, Animation, Callback Function, Parameter, Beats, URL, Music Visualization, chord, chord progression, Artificial Intelligence (AI), Meme, Collage, Filter, Color saturation, Contrast, Brightness, Inversion, Pop Art, Abstract Expressionism, Face Tracking, event handler, Image Filter, GIF, Scene, Copyright

### **Planned Learning Experiences**

Explorations in Coding Modules: Sports, Art, and Music

Students will choose one or more of these modules to see how coding could apply in other fields. These modules are intended to inspire students to think outside of the box. These explorations are student-paced and interactive. The teacher will facilitate student progress and encourage brainstorming of ideas for the CYOP Project.

#### **Assessments**

#### **Formative Assessments**

Benchmark Check in Tasks

Students will be given questions each day as they work on their CYOP to inform the teacher of their progress, reflect on the collaboration process, and determine goals for the next class.

**Collaboration Team Meetings** 

Small student design teams will meet with the teacher to learn about different techniques to facilitate their progress to implement their design.

#### **Summative Assessments**

Create Your Own Program (CYOP) and Presentation

Students are expected to create an original functioning program to solve a problem, enable innovation, explore personal interests, or express creativity, either individually or in small groups. The program must run as intended, and the presentation must include at least one example of the code functioning properly. Students will also need to describe the overall purpose of the program, describe the functionality of the program, explain how the program implements coding techniques that improves its efficiency, etc., etc.

#### NJSLS Standards

NJSLS Standards Copied and Pasted as well as linked.

#### **NJSLS Computer Science and Design Thinking**

- 8.2.12.ED.1: Use research to design and create a product or system that addresses a problem and make modifications based on input from potential consumers.
- 8.2.12.ED.2: Create scaled engineering drawings for a new product or system and make modification to increase optimization based on feedback.
- 8.2.12.ED.3: Evaluate several models of the same type of product and make recommendations for a new design based on a cost benefit analysis.
- 8.2.12.ED.4: Design a product or system that addresses a global problem and document decisions made based on research, constraints, trade-offs, and aesthetic and ethical considerations and share this information with an appropriate audience.
- 8.2.12.NT.1: Explain how different groups can contribute to the overall design of a product.

8.2.12.NT.2: Redesign an existing product to improve form or function.

#### **Additional NJSLS Standards**

NJSLS Standards Copied and Pasted as well as linked.

### **Interdisciplinary Connections**

NJSLS Career Readiness, Life Literacies, and Key Skills

# NJSLS Companion Standards Grades 9-12 (Reading & Writing in Science & Technical Subjects)

- 9.4.12.CI.1: Demonstrate the ability to reflect, analyze, and use creative skills and ideas
- 9.4.12.CI.2: Identify career pathways that highlight personal talents, skills, and abilities (e.g.,
- 1.4.12prof.CR2b, 2.2.12.LF.8).
- 9.4.12.CI.3: Investigate new challenges and opportunities for personal growth, advancement, and transition
- 9.4.12.CT.1: Identify problem-solving strategies used in the development of an innovative product or practice
- 9.4.12.CT.2: Explain the potential benefits of collaborating to enhance critical thinking and problem solving (e.g., 1.3E.12profCR3.a).
- 9.4.12.CT.3: Enlist input from a variety of stakeholders (e.g., community members, experts in the field) to design a service learning activity that addresses a local or global issue (e.g., environmental justice).
- 9.4.12.CT.4: Participate in online strategy and planning sessions for course-based, school-based, or other project and determine the strategies that contribute to effective outcomes.
- 9.4.12.DC.7: Evaluate the influence of digital communities on the nature, content and responsibilities of careers, and other aspects of society

# **Modifications/Accommodations**

#### GENERAL CONSIDERATIONS FOR DIVERSE LEARNERS

English Language
Learners

Students Receiving Special Education Services

Advanced Learners

- Personal glossary - Small group/One to one - Use of high level

- Text-to-speech	- Additional time	academic vocabulary/texts
<ul><li>Extended time</li><li>Simplified / verbal</li></ul>	<ul><li>Review of directions</li><li>Student restates information</li></ul>	- Problem-based learning
instructions - Frequent breaks	- Space for movement or breaks	- Pre assess to condense curriculum
WIDA G. D	<ul><li>Extra visual and verbal cues and prompts</li><li>Preferential seating</li></ul>	- Interest-based research
WIDA Can Do Descriptors for Grade 9- 12		- Authentic problem- solving
WIDA Essential Actions Handbook	<ul><li>Rest breaks</li><li>Verbal and visual cues regarding directions and staying</li></ul>	- Homogeneous grouping opportunities
FABRIC Paradigm	on task - Checklists	Knowledge and Skill Standards in Gifted Education for All
Wall Township ESL Grading Protocol	- Immediate feedback	Pre-K-Grade 12 Gifted
*Use WIDA Can Do Descriptors in coordination with Student Language Portraits (SLPs).	Students receiving Special Education programming have specific goals and objectives, as well as accommodations and modifications outlined within their Individualized Education Plans (IEP) due to an identified disability	Programming Standards Gifted Programming Glossary of Terms
	and/or diagnosis. In addition to exposure to the general education curriculum, instruction is differentiated based upon the student's needs. The IEP acts as a supplemental curriculum guide inclusive of instructional strategies that support each learner.	Students with 504 Plan
