# Unit 9: Exponential Functions 

| Content Area: | Mathematics |
| :--- | :--- |
| Course(s): | Algebra $\mathbf{8}$ |
| Time Period: | April |
| Length: | $\mathbf{3}$ weeks |
| Status: | Published |

## Transfer

## Big Idea: Exponential Functions

## Essential Questions

How do the characteristics of exponential functions affect the graph?

How do you use exponential growth and decay to model real-life situations?

## Enduring Understandings

A single quantity may be represented by many different expressions

All of the facts of arithmetic and algebra follow from certain properties

Many real-world mathematical problems can be represented algebraically. These representations can lead to algebraic solutions

## Standards in Mathematics

| MA.F-BF.A | Build a function that models a relationship between two quantities |
| :--- | :--- |
| MA.F-BF.A. 1 | Write a function that describes a relationship between two quantities. |
| MA.F-BF.A. 2 | Write arithmetic and geometric sequences both recursively and with an explicit formula, <br> use them to model situations, and translate between the two forms. |
| MA.F-IF.C | Analyze functions using different representations |
| MA.F-IF.C.7e | Graph exponential and logarithmic functions, showing intercepts and end behavior, and <br> trigonometric functions, showing period, midline, and amplitude. |

| MA.F-IF.C.8b | Use the properties of exponents to interpret expressions for exponential functions. |
| :---: | :---: |
| MA.F-LE.A | Construct and compare linear and exponential models and solve problems |
| MA.F-LE.A. 2 | Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table). |
| MA.F-LE.A. 3 | Observe using graphs and tables that a quantity increasing exponentially eventually exceeds a quantity increasing linearly, quadratically, or (more generally) as a polynomial function. |
| MA.F-LE.A.1a | Prove that linear functions grow by equal differences over equal intervals, and that exponential functions grow by equal factors over equal intervals. |
| MA.F-LE.A.1b | Recognize situations in which one quantity changes at a constant rate per unit interval relative to another. |
| MA.F-LE.A.1c | Recognize situations in which a quantity grows or decays by a constant percent rate per unit interval relative to another. |
| MA.F-LE.B. 5 | Interpret the parameters in a linear or exponential function in terms of a context. |
| MA.K-12.3 | Construct viable arguments and critique the reasoning of others. |
| MA.K-12.4 | Model with mathematics. |
| MA.K-12.5 | Use appropriate tools strategically. |
| MA.N-RN.A | Extend the properties of exponents to rational exponents. |
| MA.N-RN.A. 1 | Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. |
| MA.N-RN.A. 2 | Rewrite expressions involving radicals and rational exponents using the properties of exponents. |
| MA.A-SSE.B | Write expressions in equivalent forms to solve problems |
| MA.A-SSE.B.3c | Use the properties of exponents to transform expressions for exponential functions. |

## Critical Knowledge and Skills

## Vocabulary

## Vocabulary:

Compound Interest, Decay Factor, Exponential Decay, Exponential Function, Exponential Growth, Geometric Sequence, Growth Factor, Index

## Learning Objectives

Simplify expressions involving zero and negative exponents (N.RN.1)

Multiply powers with the same base (N.RN.1)
Raise a power to a power (N.RN.1)
Raise a product to a power (N.RN.1)
Divide powers with the same base (N.RN.1)
Raise a quotient to a power (N.RN.1)
To rewrite expressions involving radicals and rational exponents (N.RN.2)
Evaluate and graph exponential functions (F.LE.1.a,b,c)
Model exponential growth and decay (F.IF.7.e, F.IF.8.b, F.LE.1.c)
Write and use recursive formulas for geometric sequences (F.BF.1,2, F.LE.2)
Observe using graphs and tables that exponential growth functions will eventually exceed a quantity increasing linearly or quadratically (F.LE.A.3)

Interpret the parameters in an exponential function in terms of context (F.LE.5)
Use properties of exponents to transform expressions for exponential functions (A.SSE.3.c)
