2. The causes and nature of each of these revolutions were different, as well as their degrees of radicalism and violence. The result was the development of new and different forms of governments.
3. New technology has always transformed the way people live in both positive and negative ways and revolution tends to

<p>5. Can imperialism ever be justified?</p>	<p>lead to ripple revolutions. Availability of goods and improvements in transportation and health are weighed against deplorable living/working conditions and pollution; and new ideologies emerged to address the new challenges.</p> <p>4. In response to the massive changes brought about by the Industrial Revolution new ideologies developed causing social unrest and political conflict and reforms; in addition, the development of labor unions and women's rights groups took place.</p> <p>5. "New" imperialism led to the exploitation of indigenous populations and perpetuated Western misconceptions developed in previous eras about race and superiority in relation to others in the world. The imperial powers justified taking resources and denying colonists self-government by claiming they were bringing "civilization" to undeveloped parts of the world through western science, technology and education.</p>

Unit Title #: Era 4. Half-Century of Crisis and Achievement: The Era of the Great Wars

Unit Summary: Nationalism, imperialism, industrialization, and militarism contributed to an increase in economic and military competition among European nations, the Ottoman Empire, and Japan, and led to World War I. The failure of the Treaty of Versailles, the impact of the global depression, and the expansionist policies and actions of Axis nations are viewed as major factors that resulted in World War II. World Wars I and II were "total wars" in which nations mobilized entire populations and economies and employed new military tactics that resulted in unprecedented death and destruction, as well as drastic changes in political boundaries. World Wars I and II challenged economic and political power structures and gave rise to a new balance of power in the world. Economic, technological, and military power and bureaucracies have been used by nations to deliberately and systematically destroy ethnic/racial, political, and cultural groups.
