Holocaust: The Nazis targeted specific groups for genocide to create a "master race." The savagery of war and indecencies against humanity were prevalent during World War II.

Unit Essential Questions:

- 1. When is war justified?
- 2. What political, economical, and military mistakes did the Axis powers make that cost them the war?

- 4. How did the US mobilize the homefront war effort?
- 5. What groups of people did the Nazi's target and why?
- 6. What was the cost of human life during WWII and how did it have a global impact?

Students will know:

- During the first two years of the war, the United States stayed officially neutral while Germany overran France and most of Europe and pounded Britain from the air (the Battle of Britain). In mid-1941, Hitler turned on his former partner and invaded the Soviet Union.
- Despite strong isolationist sentiment at home, the United States increasingly helped Britain. It gave Britain war supplies and old naval warships in return for military bases in Bermuda and the Caribbean. Soon after, the Lend-Lease Act gave

Unit Enduring Understandings:

- 1. The United States policy of neutrality in World War II was no longer a viable option following the events of Pearl Harbor.
- 2. Military miscalculations by the leadership of the Axis powers led to a strategic Allied victory in World War II.
- 3. The war strategy of the United States in the Pacific led to America's victory against Japan.
- 4. World War II was a total war in which all of America's economic and human resources had to be mobilized to their greatest capacity.
- 5. The Nazis targeted specific groups for genocide to create a "master race."

- Analyze the Holocaust (Hitler's "final solution"), its impact on Jews and other groups, and the postwar trials of war criminals.
- Evaluate and explain the treatment of prisoners of war and civilians by the Allied and Axis powers.

the president authority to sell or lend equipment to countries to defend themselves against the Axis powers. Franklin Roosevelt compared it to "lending a garden hose to a next-door neighbor whose house is on fire."

- While negotiating with the United States and without any warning, Japan carried out an air attack on the American naval base at Pearl Harbor, Hawaii, on December 7, 1941. The attack destroyed much of the American Pacific fleet and killed several thousand Americans. Roosevelt called it "a date that will live in infamy" as he asked Congress to declare war on Japan.
- After Pearl Harbor, Hitler honored a pact with Japan and declared war on the United States.
 The debates over isolationism in the United States were over. World War II was now a true world war, and the United States was fully involved.

Denotation of and atomic weapons testing as well as new chemicals start the beginnings of the 'greenhouse effect' and other climate issues.

6.1.12.EconNE.12.a: Assess the impact of agricultural innovation on the world economy

During the Cold War, America's agricultural economy became a symbol of power and was used as a psychological weapon against the USSR. The late 1950s–1960s began the chemical revolution in agricultural science, with the increasing use of anhydrous ammonia as a cheap source of nitrogen spurring higher yields. By the end of the 1980s, farmers were using low-input sustainable agriculture (LISA) techniques to decrease chemical applications.

Unit Essential Questions:

- 1. What is the difference between communism and capitalism/democracy?
- 2. What was the impact of the Space race on the American government, American people, and the science community?
- 3. How did the US ensure economic growth and stability?
- 4. How did agricultural inventions impact the world economy?
- 5. What constitutional controversies existed over war conflicts during the Cold War?
- 6. Did the US support or oppose independence movements around the world?

Unit Enduring Understandings:

- 1. The United States and the Soviet Union represented starkly different fundamental values. The United States represented democratic political institutions and a generally free market economic system. The Soviet Union was a totalitarian government with a communist (socialist) economic system.
- 2. NASA was formed under John F. Kenedy as the "race to the moon" took off between the US and the USSR. The US government would spare no expense to increase technology. When the USSR launched Sputnik, the first space satellite, Americans lived in fear. African American women Katherine Johnson, Dorothy Vaighn, and Mary Jackson made enormous contributions to the development of the Apollo 11.
- 3. The heavy military expenditures throughout the Cold War benefited the US economy. New inventions in the 1950's created a flourishing economy under Eisenhower. The baby boom increased the needs for products and goods.

- 7. How were civil liberties infringed upon during the era of McCarthyism?
- 8. Has the development of nuclear weapons affected international relationships and conflicts?
- 9. How did American Foreign policy lead to the Korean War, Vietnam War, and Cuban Missile crisis? When do our freedoms and traditions become sacrificed for security?
- 10. How did the Arab-Isralei conflict influence American Foreign Policy?
- 11. What is our role as a Superpower and how does it sometimes conflict with our values?
- 4. During the Cold War, America's agricultural economy became a symbol of power and was used as a psychological weapon against the USSR. As a result, the American farmer was elevated beyond a mere producer of substance to an active cold war participant. The ramifications of agriculture's role in the cold war have lasted for decades in the form of subsidies, surpluses, and a lasting welfare system for farmers and agricultural interests.
- 5. Civil liberties of people were violated when they were accused and convicted of being communist without substantial proof. People in Hollywood were "Blacklisted" from the movie industry.
- 6. As countries began to decolonize it was important to the US that they did not turn into communist countries. Decolonizing countries were looking for help from either the US or the USSR to escape the colonial empire. The United States practiced a kind of informal imperialism where they replaced leaders they did not like in other countries—Patrice Lumumba in the Democratic Republic of the Congo and Salvador Allende in Chile were prime examples.
- 7. The Second Red Scare of the late 1940's and early 1950's was a grave threat to rights guaranteed in the Bill of Rights. Senator Joseph McCarthy played on American fears of communism by recklessly accusing many American governmental officials and other citizens of being communists, based on flimsy or no evidence. This led to the coining of the term *McCarthyism*—the making of false accusations based on rumor or guilt by association. The convictions of Julius and Ethel Rosenberg for spying for the Soviet Union and the construction of nuclear weapons by the Soviets, using technical secrets obtained through spying, increased domestic fears of communism.
- 8. After the Soviet Union matched the United States in nuclear weaponry in the 1950s, the threat of a nuclear war that would destroy both countries was ever-present throughout the Cold War. America, under President Eisenhower, adopted a policy of "massive retaliation" to deter any nuclear strike by the Soviets.
- 9. The Truman Doctrine of "containment of communism" was a guiding principle of American foreign policy throughout the Cold War—not to uproot communism where it already existed, but to keep it from spreading and to resist communist aggression into other countries. The Korean War, Vietnam War and the Cuban Missile crisis with the Soviet Union led to missteps that we have to deal with in the future.

Climate Change: 6.1.12.GeoHE16.a: Explain why natural resources (i.e., fossil fuels, food, and water) continue to be a source of conflict and analyze how the United States and other nations have addressed issues concerning the distribution and sustainability of natural resources and climate change.

Unit Essential Questions:

- 1. How has the media and technology impacted civic participation?
- 2. How has the US government tried to address ethical issues in science, business, and technology?
- 3. Has the US been effective in addressing economic issues at home and in other countries?
- 4. What impact have fossil fuels have on the world's climate?
- 5. What has been the impact of technology on the global workforce?
- 6. Has international trade affected the US Economy and workforce?
- 7. How has social media promoted American culture around the world?
- 8. What has caused the separation of two economic classes (rich and poor)?

Unit Enduring Understandings:

- The foundation of democracy is to rely on strong civic engagement.
 Today, it is widely recognized that digital technologies offer exciting opportunities to facilitate a stronger and more inclusive civil society.
- 2. The government has organizations, such as the National Institute of Standards and Technology, the Office of Science and Technology Policy (OSTP), and the Office of American Innovation, and the US Defense Advanced Research Projects Agency (DARPA).
- 3. Entering the 21st century, the US is unchallenged as the world's economic leader. Economic engagement with the rest of the world has played a key part in the success of the U.S. economy.
- 4. When fossil fuels are burned, they release large amounts of carbon dioxide, a greenhouse gas, into the air. Greenhouse gasses trap heat in our atmosphere, causing global warming.
- 5. Automation, digital platforms, and other innovations are changing the fundamental nature of work. Many activities that workers carry out today have the potential to be automated. At the same time,

more and more people are working from home using the technology relied upon during the pandemic.

- 6. Trade creates jobs. International trade lowers the cost and increases the variety of U.S. consumer purchases, benefits U.S. workers who make exports and those who rely on imports as key inputs, and helps fuel innovation, competition, and economic growth.
- 7. Almost everyone utilizes one social media platform or another regularly, with the result being an immense change in how people communicate and interact with each other, not just online but in the "real world" as well. American culture is being disseminated on every social media platform around the world.
- 8. Economic gaps are growing in several different ways, including family structure, education, lifestyle, and geography.

Students will know:

- Strong civic engagement includes participation in, national, and local elections. Individual members of society take a proactive role in shaping and contributing to public life.
- The internet brings convenience to our everyday lives, but raises issues around privacy. Virtual reality can educate us, but can also be addictive. Ethical issues arise with the invention of new technologies. However, if government organizations are at the forefront of testing these technologies and setting the standards for usage, they will help to ensure the protection of the citizens and businesses.
- America's increasing economic interdependence with the rest of the world, is known as "globalization."
- Due to the burning of fossil fuels, the average global temperature has increased by 1 degree celsius.
- New technologies have the potential to upend much of what we know about the way people work. But disruption is an opportunity as well as a challenge—given the promise of digital talent platforms and new options for independent work. We have yet to reach the full potential of digitization across the global economy.

Students will be able to:

- Describe how media and technology has impacted civic participation
- Analyze government efforts to address issues in science, medicine, and business that arise from the global use of new technologies.
- Assessthe effectiveness of the United States government in addressing economic issues.
- Explain why natural resources continue to be a source of conflict and the impact of climate change.
- Assess the impact of technology on the global workforce.
- Assess the impact of international trade on the United States economy and workforce.
- Analyze the impact of American culture on other world cultures
- Explain the impact of social media on the dissemination of American culture.
- Evaluate the widening of the gap between the two economic classes.

- The social media effect is palpable. You can share content one day and the next thing you know, your website is gaining traffic because people responded to your content. Furthermore, people are consuming American social media videos at an incredible rate.
- The American classes are parting, slowly but surely, away from one another. This separation is most obvious in terms of income where the people at the top have been prospering while the majority lags behind.
