Enduring Understandings

- The Protestant and Catholic Reformations fundamentally changed theology, religious institutions, and culture.
- Religious reform both increased state control of religious institutions and provided justifications for challenging state authority.
- Conflicts among religious groups overlapped with political and economic competition within and among states.

Essential Questions

- In what ways does emphasis on the individual’s ability to interpret canonical works – legal, theological, or otherwise - undermine existing power structures?
- How does the overlap of religious and political authority manifest itself? How does the separation of religious and political authority manifest itself?

Content

1. Christian humanism, embodied in the writings of Erasmus, employed Renaissance learning in the service of religious reform. (ex: Sir Thomas More, Juan Luis Vives)
2. Reformers Martin Luther and John Calvin, as well as religious radicals such as the Anabaptists, criticized Catholic abuses and established new interpretations of Christian doctrine and practice (ex: indulgences, nepotism, simony, pluralism and absenteeism)
3. The Catholic Refomation, exemplified by the Jesuit Order and the Council of Trent, revived the church but cemented the division within Christianity (ex: St. Teresa of Avila, Ursulines, Roman Inquisition, Index of Prohibited Books)
4. Monarchs and princes, such as the English rulers Henry VIII and Elizabeth I, initiated religious reform from the top down (magisterial) in an effort to exercise greater control over religious life and morality. (ex: Spanish Inquisition, Concordat of Bologna (1516), Book of Common Prayer, Peace of Augsburg)
5. Some Protestants, including Calvin and the Anabaptists, refused to recognize the subordination of the church to the state.
6. Religious conflicts became a basis for challenging the monarchs' control of religious institutions. (ex: Huguenots, Puritans, Nobles in Poland)
7. Issues of religious reform exacerbated conflicts between the monarchy and the nobility, as in the French Wars of Religion (ex: Catherine de Medici, St. Bartholomew's Day Massacre, War of the Three, Henry IV)
8. The efforts of Habsburg rulers failed to restore Catholic unity across Europe (ex: Charles I/V, Philip II, Philip III, Philip IV)
9. States exploited religious conflicts to promote political and economic interests (ex: Catholic Spain and Protestant England; France, Sweden, and Denmark in the Thirty Years' War)
10. A few states, such as France with the Edict of Nantes, allowed religious pluralism in order to maintain domestic peace (ex: Poland, the Netherlands)
11. Reflecting folk ideas and social and economic upheaval, accusations of witchcraft peaked between 1580 and 1650.
12. Local and church authorities continued to enforce communal norms through rituals of public humiliation (ex: charivari, stocks, public whipping and branding)
13. Social dislocation, coupled with the weakening of religious institutions during the Reformation, left city governments with the task of regulating public morals (ex: new secular laws regulating private life, stricter codes on prostitution and begging, abolishing or restricting Carnival, Calvin's Geneva)

Skills
