

Unit 9: Social Psychology

Content Area: **Social Studies**
Course(s): **AP Psychology**
Time Period: **April**
Length: **10 blocks**
Status: **Published**

Group dynamics, conformity, compliance, and obedience

Students will examine how humans interact in groups and social situations, as well as how others can affect an individual's behavior and mental processes.

Enduring Understandings

- Attribution theory can explain motives.
- Social and cultural categories influence self-concept and relations with others.
- Self-fulfilling prophecies impact behavior.
- Attitudes form and change leading to persuasion strategies and cognitive dissonance.
- Individuals respond to expectations of others, including groupthink, conformity, and obedience to authority.
- Psychologists can predict the impact of the presence of others on individual behavior.
- Different processes contribute to differential treatment of group members.
- Social variables contribute to altruism and aggression, as well as attraction.

Essential Questions

1. How do people explain (or attribute) the behavior of others?
2. What impact do these attributions have on individuals and society as a whole?
3. How are individuals affected by groups?
4. Under what conditions do people obey, conform, make friendships, find love, and help others?
5. How do attitudes and actions influence individual and group behavior?
6. How do psychologists define culture? What influence does culture have on individuals and groups?

Content

Topics will include:

- How social and cultural categories like gender and race can impact self-concept and behavior
- The factors that lead people to form and change attitudes
- Group dynamics, including conformity, compliance, and obedience to authority
- Types of behavior caused by the presence of others
- Bias, prejudice, and discrimination

- Altruism and aggression
- Variables that contribute to attraction

Student Expectations

I. Social Psychology

AP students in psychology will be able to:

- Apply attribution theory to explain motives (e.g., fundamental attribution error, self-serving bias). ✖
- Describe the structure and function of different kinds of group behavior (e.g., deindividuation, group polarization). ✖
- Explain how individuals respond to expectations of others, including groupthink, conformity, and obedience to authority. ✖
- Discuss attitudes and how they change (e.g., central route to persuasion). ✖
- Predict the impact of the presence of others on individual behavior (e.g., bystander effect, social facilitation). ✖
- Describe processes that contribute to differential treatment of group members (e.g., in-group/out-group dynamics, ethnocentrism, prejudice). ✖

- Articulate the impact of social and cultural categories (e.g., gender, race, ethnicity) on self-concept and relations with others. ✖
- Anticipate the impact of behavior on a self-fulfilling prophecy. ✖
- Describe the variables that contribute to altruism, aggression, and attraction. ✖
- Discuss attitude formation and change, including persuasion strategies and cognitive dissonance. ✖
- Identify important figures in social psychology (e.g., Solomon Asch, Leon Festinger, Stanley Milgram, Philip Zimbardo). ✖
