### [Bloom's Taxonomy](#)

Define receivables, and explain the allowance method for valuation of receivables as an application of accrual accounting.

Apply the allowance method of accounting for uncollectible accounts.

Make common calculations for notes receivable.

Show how to evaluate the level of receivables, and identify alternative means of financing receivables.

Identify the classification of long-term assets, and describe how they are valued by allocating their costs to the periods that they benefit.

Account for the acquisition costs of property, plant, and equipment.

Compute depreciation under straight-line, production, and declining-balance methods.

Account for the disposal of depreciable assets.

Identify the issues related to accounting for natural resources, and compute depletion.

Identify the issues related to accounting for intangible assets, including research and development costs and goodwill.

Describe the disclosure of acquiring and financing long-term assets, and calculate free cash flow.
