Enduring Understandings

[Samples](#)

Product planning allows a business to design marketing programs that increase sales by making products that customers want.

After products are introduced in the marketplace, they go through different stages of growth and decline. It is important to understand the different marketing strategies used to sustain product sales over time.

While branding gives a specific company or product brand personality, packaging and labels put a “face” on a product.

Effective packaging and labels create a good impression, help sell the product, and communicate benefits to customers.
