

Unit 5: Color Yourself healthy with vitamin/mineral

Content Area: **Language Arts Literacy**
Course(s): **Food and Fitness**
Time Period: **January**
Length: **10 blocks**
Status: **Published**

Transfer

Eating a variety of colorful fruits and vegetables promotes good health and wellness and helps prevent disease.

Enduring Understandings

Current and future personal wellness is dependent upon applying nutrition related concepts and skills in everyday lifestyle behaviors.

There are many short and long term health benefits and risks associated with nutritional choices.

If your diet is lacking fruits and vegetables it can negatively affect your health.

If your diet is lacking milk and milk products it can negatively affect your health.

The art of cooking and baking combined with informed nutritional food choices set the foundation for healthy living and wellness.
