Enduring Understandings

Customization in accessories for mobile and electronic devices is a growing trend. Mobile phone cases were the most popular accessories purchased in 2012, which grew 69% from 2011.

Most people view their electronic devices as a thing of beauty and fashion, so it makes sense that consumers will seek out the greatest accessories for these devices to further showcase their sense of style.

There are different schools of thought in the design industry when it comes to electronic devices covers. Some believe that putting a case on an electronic device is like “painting your Ferrari with rust-proofing paint and then wrapping it in burlap.” These are the thoughts of the device designers who slaved over the drawing board for hours to provide the consumer with a sleek design and brand identity.

Essential Questions

What are the characteristics of professional and effective electronic device covers?

Do you have a designer case or skin for an electronic that you own? What made you pull it off the shelf and make the purchase?

How do the art elements and principles of design play a role in effective skin or case design?

Do you think that purchasing a skin or a cover for your device is a disservice to the art designers who created the aesthetics of that electronic device?

How is a product’s aesthetic design related to branding?
