## Enduring Understandings

---

Effective comprehension of Latin is dependent on students' skill in identifying definitions and metrical devices in order to readily interpret summations and literal translations of Latin words.

The ability to combine the knowledge of use, grammar/syntax, morphology, and vocabulary of the Latin language should be implemented to create the most literal, yet reflective, translation possible.

Text analysis should seek to reflect upon the knowledge of the Latin work through clear and coherent arguments

## Essential Questions

Applicable NJSLS-WL intercultural statements (interpretive mode of communication, intermediate high/mid):

- Through the target language, learners identify and investigate typical products related to everyday life in the target culture(s) and in the learners' own culture. They use their insights to infer perspectives (attitudes, values, beliefs, the way a native speaker living in the target culture interprets meaning) of the target culture society.
- Learners recognize and identify a few typical practices of the target culture in order to gain understanding of the perspectives of the target culture(s) and their societies.

Presentational mode:

Although Latin is explored in primarily the interpretive mode, the poetic form of the Aeneid is especially susceptible to skill acquisition through the learning and presentation of dactylic hexameter. Information is conveyed through the poetic format. Accordingly, scansion of Dactylic hexameter and presentation of the text in metrically accurate format aligns with NJSLS-WL standard: • 7.1.IH.PRSNT.1: Present detailed information orally and in writing on information gathered from culturally authentic resources, using short paragraphs and often using major time frames.
