Enduring Understandings

Effective comprehension of Latin is dependent on students' skill in identifying definitions and metrical devices in order to readily interpret summations and literal translations of Latin words.

Contextual knowledge is informed through historical and mythological concepts.

The synthesis of comprehension, translation, and contextualization should be clear in students' analysis of texts.

Essential Questions

Theme 1: Literary Genre and Style Essential Questions:

- What means do the authors use to develop characters in the works? How do the authors portray female characters?
- How do the authors use characterization to develop key themes?

audience, purpose).

Argumentation 5.B Support the argument using relevant evidence from Latin texts and readings in English.

The reading of Books 6, 8 and 12 in translation will provide context for the readings in Latin and an opportunity to explore the thematic issues present in the Aeneid. These passages are also particularly suitable for practicing skills needed for sight reading in Latin.

These readings, while not in the target language, provide context for readings in the target language and appeal to NJSLS-WL standards:

- 7.1.IH.IPRET.1: Summarize the main idea, several details, and some inferences of literary or informational texts on a range of topics.
- 7.1.IH.IPRET.8: Collect, share, and analyze data related to global issues including climate change.

Applicable NJSLS-WL intercultural statements (interpretive mode of communication, intermediate high/mid):

- Through the target language, learners identify and investigate typical products related to everyday life in the target culture(s) and in the learners' own culture. They use their insights to infer perspectives (attitudes, values, beliefs, the way a native speaker living in the target culture interprets meaning) of the target culture society.
- Learners recognize and identify a few typical practices of the target culture in order to gain understanding of the perspectives of the target culture(s) and their societies.

Presentational mode:

Although Latin is explored in primarily the interpretive mode, the poetic form of the Aeneid is especially susceptible to skill acquisition through the learning and presentation of dactylic hexameter. Information is conveyed through the poetic format. Accordingly, scansion of Dactylic hexameter and presentation of the text in metrically accurate format aligns with NJSLS-WL standard: • 7.1.IH.PRSNT.1: Present detailed information orally and in writing on information gathered from culturally authentic resources, using short paragraphs and often using major time frames.
