Inside the volcano, there are hot liquid rocks called magma. It becomes lava when it comes out of the volcano. The lava that flows out of some volcanoes can reach up to 1100 degrees. It's hot enough to burn you and in some cases, it can kill you. Other than lava, gases coming out of the volcano are poisonous to us.

What is the main idea?

- Volcanoes are really dangerous.
- Lava is hot.
- Gases emitted from volcanoes are poisonous.

Main Idea 4

My dog is called Buttons and he learns new tricks really quickly. When I say "Hands", he will give me one of his front paws. He can even walk on two legs when I tell him to. It only took me 3 days to teach him these tricks. I don't think other dogs can learn as quickly as Buttons. He is the best.

What is the main idea?

- My dog is not clever.
- My dog is the smartest dog in the world.
- I am a good dog trainer.

Main Idea 5

For a kite to fly, the weather needs to be good and windy. If there is no wind, the kite will never fly. You need to find a spacious place to fly your kite. It is dangerous to fly your kite near roads, power lines or an airport.

What is the main idea?

- Flying kites are not fun.
- Kites can break easily.
- Getting kites fly in the air is hard.
