They will be introduced to opportunity costs and benefits and the relationship between scarcity and choice. The students will identify different kinds of producers, what goods they make and sell, and what services they provide to customers. In addition, they will study the relationship between supply and demand in a free enterprise system. They will distinguish between natural resources, human resources, and capital resources in the production of a good. As one example of production of a good, the students will learn about the resources needed to produce blue jeans and the process of making them.
