Activities

- Listen to a dramatic reading of Walt Whitman's poem, "Pioneers O' Pioneers"
- Write two new stanzas for the poem, "Pioneers O' Pioneers"; the new verses ought to reflect the new frontiers that are being explored in contemporary society
- Label five western trails on a map of the US; answer critical thinking questions and discuss student

responses

- Students will use a list of common wagon train supplies to stock a fictional covered wagon
- Place students in groups to compare their covered wagon supplies
- Together the group will create a supply list, then justify their selections in a whole-class discussion and a post-activity assessment worksheet
- Cookie mining activity
 - Students will start the activity with nineteen dollars in "social studies" money
 - First, students will choose two tools out of three possible choices, the better the tool, the more expensive it will cost
 - Next, students will choose a cookie to mine for chocolate chips, the better the cookie, the more it will cost
 - Then, students will mine their cookies for chocolate chips
 - After they finish mining, the students will complete a worksheet to assess if they were successful miners and justify the results of that assessment
 - Finally, students will equate cookie mining to the gold rush of 1849, i.e. a few miners became wildly successful, most just barely got by, and some failed miserably
- Read a short biography of the legendary Native American, Sitting Bull, and complete comprehension questions about his life, accomplishments, and legacy
- Complete a document analysis of a Native American primary source
- Students will use project description and rubric to complete the westward expansion project
- Use Maps101 to compare the different settlements of Texas from the colonial era, as a part of Mexico, early American settlements, and independence (see specified link)

 - Variety of workspace arrangements
 - Organizational tools – labeled bins or cabinets for materials
 - Seating arrangements – minimize distractions, provide positive student models
- **General modifications based on student response may include:**
 - Extended time
 - Practice exercises
 - Use of preferred response mode

Content specific modifications for students with special needs may include:

- Modifications & accommodations as listed in the student’s IEP
- The teacher will assign students to work together on the Westward Expansion project, these groups will place students to work together for their optimal performance
- The teacher will assign the students to work together on the Westward Expansion project, however, the students may choose a topic for themselves other than the teacher-suggested topics (intermediate activity)
- Pair mixed ability students together to work on creating two new stanzas for "Pioneers O' Pioneers"
- Provide a completed map of five western trails
- Model for students the correct procedure for completing a document analysis
- As necessary give students completed study guides
- Modify tests and quizzes as required or in certain situations as appropriate

Content specific modifications for ELL's may include:

- Tap the student's prior knowledge and experience, which may be different from other students in the class
- Collaboration with ELL Teacher
- Content specific vocabulary important for ELL students to understand include: Manifest Destiny,

territory, settler, boom, expansion

Content specific modifications to extend learning for gifted students may include:

- At the conclusion of the westward expansion project each member of every group will write two paragraphs summarizing the project; some students may write a third paragraph, the third paragraph should make connections between the project idea and its modern legacy, e.g. San Francisco started as a boomtown (challenge activity)

Integrated/Cross-Disciplinary Instruction

Students could build on the information they have learned in this unit about the 1849 California Gold Rush and complete a gold rush research project in their math classes. Math teachers may have students research on the Internet gold prices from 1849, the amount of gold discovered during the gold rush, the 1849 gold price adjusted for inflation in 2010 dollars, and the current price of gold. This data can be used to create a bar graph to complete the assignment.
