- Students will identify a time that they felt proud of an accomplishment. Students will write a paragraph that describe feelings that were felt at the time.

Activities to Differentiate Instruction

General Modification for All Students May Include:

- Follow the differentiation pattern of:
 - Identification of Objectives
 - Pre-Assessment of student understanding
 - Differentiated Activity
 - Whole-Group Discussion
 - Post-Assessment
 - Flexible Grouping strategies:
 - Readiness Groups – “readiness” refers to a student’s grasp of a particular concept or task
 - Student Choice Groups
 - Interest Groups
 - Learning Profile Groups
 - When working in groups, students may benefit from having assigned roles in the group,

which could be differentiated based on student's ability. Examples include, "facilitator", "materials coordinator", "time keeper", and "task master".

- Provide student choice for assignments and activities that may appeal to their interests or particular abilities
- Provide visual and auditory learning supports

Content Specific Modifications for Special Education Students May Include:

- Modifications and accommodations as listed the student's IEP
- One-on-one supports
- Prioritize tasks
- Modified or reduced assignments
- Provide pictures that support good health of body, mind and getting along.
- Provide vocabulary cards as needed.
- Provide pictures that depict human development.
- Provide sentences on sentence strips as needed.
- Make a book that will show what they hope to be able to do one year from now.

Differentiation for ELL's May Include:

- General modifications may include:
 - Integrate activities into thematic units
 - Trigger student's prior knowledge and experience, which may be different from other students in the class
 - Scaffold complex texts
 - Collaboration with ELL teacher
 - Content specific vocabulary important for ELL students to understand include: baby, toddler, adolescent, adult

Differentiation to Extend Learning for Gifted Students May Include:

- Describe a warning that a sense organ could give you.
- Work in group to identify emotions through a feelings concentration game.
- Helping Hands Activity where Students will write/draw on a hand shape the ways friends help one another.
- Provide blank booklet for extension activity.
- When differentiating for gifted learners, consider the following three areas to differentiate: content, process, and product.
- - Content – consider leveling of resources, using additional resources, or developing learning centers. If modifying the content for students, consider various ways to modify content including acceleration of delivery, providing more depth or complexity in the topic, or creating scenarios that utilize critical or creative thinking.
 - Process – consider asking different questions or having students develop the questions, varying group patterns, or developing small groups that will enable you to target instruction
 - Product – allow for student choice in work products, independent study options related to the

content areas, or appealing to their particular strengths when considering the theory of multiple intelligences

Integrated/Cross-Disciplinary Instruction

Physical Education - In both this unit and the first unit of the physical education curriculum, students should work toward making healthy goals and figure out steps toward reaching those goals. Just as they do in Reader's and Writer's workshop, they should set attainable goals, create a plan to achieve the goal, and then track their progress toward that goal.

21st Century Skills

CRP.K-12.CRP2.1	Career-ready individuals readily access and use the knowledge and skills acquired through experience and education to be more productive. They make connections between abstract concepts with real-world applications, and they make correct insights about when it is appropriate to apply the use of an academic skill in a workplace situation.
CRP.K-12.CRP3.1	Career-ready individuals understand the relationship between personal health, workplace performance and personal well-being; they act on that understanding to regularly practice healthy diet, exercise and mental health activities. Career-ready individuals also take regular action to contribute to their personal financial well-being, understanding that personal financial security provides the peace of mind required to contribute more fully to their own career success.
CRP.K-12.CRP4.1	Career-ready individuals communicate thoughts, ideas, and action plans with clarity, whether using written, verbal, and/or visual methods. They communicate in the workplace with clarity and purpose to make maximum use of their own and others' time. They are excellent writers; they master conventions, word choice, and organization, and use effective tone and presentation skills to articulate ideas. They are skilled at interacting with others; they are active listeners and speak clearly and with purpose. Career-ready individuals think about the audience for their communication and prepare accordingly to ensure the desired outcome.
