Course Overview

The eighth grade Health curriculum builds directly upon the seventh grade curriculum. The content of each unit however has been specifically targeted toward the unique challenges facing students entering into adolescence and stage of life that brings with it greater independence and more social pressures. In units 1 and 2, students will learn how to maintain a healthy body through physical activity, fitness, and nutrition. Units 3, 4, and 5 focus on ways to protect their physical health by learning about tobacco, alcohol, and other drugs.

Students will examine the dangers that each of these substances present and learn appropriate refusal strategies. Units 6 and 7 tackle different kind of diseases. Unit 5 looks at communicable diseases and the role that immune system plays in fighting off pathogens. Unit 6 examines noncommunicable diseases including how they effect peoples lives as well as treatment options. The year rounds out with unit 8 that focuses on growth and development of the human body and the different stages of life. In addition, the eighth unit will also examine the development of a baby throughout a woman's pregnancy and the importance of prenatal care.
