Content Area: **Gifted and Talented**
Course(s): **Gifted and Talented, Technology**
Time Period: **Full Year**
Length: **Length of the Course**
Status: **Published**

Course Overview

Third grade gifted technology students will be introduced to web design. Students will have a basic understanding of core design principles that apply to web design and development. They will plan and design an effective web page. Students will enhance their web pages with the use of page layout techniques, text formatting, graphics, images, and multimedia. They will establish criteria for evaluating the quality of websites and be introduce you to color theory and web design standards. Students will add the feature of a blog to their website based on the topic they choose. They will research and map out discussions and peers will respond to each other. By the end of the year, students will produce a functional, multi-page website.
