Unit 1: Numbers 1-50

Content Area: **Spanish**
Course(s): **Spanish**
Time Period: **Week 1**
Length: **8 Weeks**
Status: **Published**

Unit Overview

In this unit, students review the numbers 1-20 and learn the numbers 21-50 in Spanish. Students will utilize number vocabulary to respond to questions on quantities of objects and costs of objects. Students will also learn how to write addition and subtraction equations in Spanish.

Standards

WL.7.1.NM.A.2	Demonstrate comprehension of simple, oral and written directions, commands, and requests through appropriate physical response.
WL.7.1.NM.A.5	Demonstrate comprehension of brief oral and written messages using age - and level - appropriate, culturally authentic materials on familiar topics.
WL.7.1.NM.B.4	Ask and respond to simple questions, make requests, and express preferences using memorized words and phrases.
WL.7.1.NM.B.5	Exchange information using words, phrases, and short sentences practiced in class on familiar topics or on topics studied in other content areas.
WL.7.1.NM.C.2	Imitate, recite, and/or dramatize simple poetry, rhymes, songs, and skits.
WL.7.1.NM.C.3	Copy/write words, phrases, or simple guided texts on familiar topics.

Essential Questions

How can Spanish number vocabulary help you with English numbers?

How might the unit vocabulary be used when traveling to a Spanish-speaking country?

How can speaking a second language help you to be successful in various professions?

Application of Knowledge and Skills...

Students will know that...

- the numbers 20-50 repeat numbers 1-9: treinta y uno (31), treinta y dos (32), treinta y tres (33)
- to ask how many items there are, one uses Cuántos/Cuántas (depending on the item's gender), names the item, and concludes with hay (there is/there are)
- to ask how much something costs, one uses Cuánto cuesta (How much does it cost), followed by the name of the item
- to respond to the question of cost, one begins with Cuesta (It costs), states the amount, and concludes with the currency
- to respond to the question of how many, one begins with hay (there is/there are). states the number amount, and concludes with the item's name

Students will be able to...

- orally express addition and subtraction equations in Spanish
- orally recognize and express Spanish numbers 1-50
- respond and answer basic questions relative to the number and cost of items
- solve equations by circling the correct Spanish response

Assessments

- Diagnostic: Other written assessments
- Formative: Dramatization
- Numbers 1-50, Unit Test
- Pre-assessment
- Store Skit
- Students create a skit in which they greet each other, ask how much various items cost, purchase an item, and say goodbye.
- Students match the number with the correct Spanish word and solve mathematical equations in Spanish. Students answer basic questions using number vocabulary.
- Students match the number with the correct Spanish word and solve the mathematical equations written in Spanish.
- Summative: Other written assessments

Activities

- play a number review game, "Caramba", counting by 10's or 5's up to 50.
- create a mathematical practice test in Spanish, exchange with a classmate to take each other's test, and correct the test they created.
- learn a traditional Spanish song to review Spanish numbers and math facts
- create flashcards to review vocabulary
