

06 Topic: Square Root Radicals Copied from: All Algebra 2, Copied on: 02/28/22

Content Area: **Mathematics**
Course(s): **Algebra 2**
Time Period: **Marking Period 2**
Length: **2 weeks**
Status: **Published**

Standards

| | |
|--------------|---|
| MA.K-12.3 | Construct viable arguments and critique the reasoning of others. |
| MA.N-RN.B.3 | Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational. |
| MA.K-12.4 | Model with mathematics. |
| MA.F-IF.C.7b | Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions. |
| MA.A-REI.A.2 | Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise. |

Enduring Understandings

1. Mathematics is a language consisting of symbols and rules.
2. The same mathematical ideas can be represented concretely or symbolically.
3. There can be different strategies to solve a problem, but some are more effective and efficient than others.

Essential Questions

How will the student perform operations with square roots?

Why might $x^2=4$ have two solutions?

Knowledge and Skills

- Simplify Square Roots
- Multiply Square Roots
- Add and Subtract Square Root Radical Expressions
- Divide Square roots and rationalize the denominator
- Rationalize Square Roots with a binomial denominator

Transfer Goals

Using mathematical reasoning and strategic thinking can allow for practical solutions of many problems.

Often unique vocabulary and implementation methods are needed to solve problems.
