

# 06 Topic: Square Root Radicals Copied from: All Algebra 2, Copied on: 02/28/22

Content Area: **Mathematics**  
Course(s): **Algebra 2**  
Time Period: **Marking Period 2**  
Length: **2 weeks**  
Status: **Published**

## Standards

---

MA.F-IF.C.7b	Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.
MA.K-12.3	Construct viable arguments and critique the reasoning of others.
MA.K-12.4	Model with mathematics.
MA.N-RN.B.3	Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational.
MA.A-REI.A.2	Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise.

## Enduring Understandings

---

1. Mathematics is a language consisting of symbols and rules.
2. The same mathematical ideas can be represented concretely or symbolically.
3. There can be different strategies to solve a problem, but some are more effective and efficient than others.

## Essential Questions

---

How will the student perform operations with square roots?

Why might  $x^2=4$  have two solutions?

## Knowledge and Skills

---

- Simplify Square Roots
- Multiply Square Roots
- Add and Subtract Square Root Radical Expressions
- Divide Square roots and rationalize the denominator
- Rationalize Square Roots with a binomial denominator

## **Transfer Goals**

---

Using mathematical reasoning and strategic thinking can allow for practical solutions of many problems.

Often unique vocabulary and implementation methods are needed to solve problems.

## **Resources**
