

14 Topic: Parabola Copied from: All Algebra 2, Copied on: 02/28/22 Copied from: Algebra 2A , Copied on: 02/28/22 Copied from: Algebra 2A , Copied on: 02/28/22

Content Area: **Mathematics**
Course(s): **Algebra 2**
Time Period: **Semester 2**
Length: **2-3weeks**
Status: **Published**

Standards

MA.F-IF.C.7a	Graph linear and quadratic functions and show intercepts, maxima, and minima.
MA.F-IF.C.7b	Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.
MA.F-IF.C.7c	Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.
MA.F-IF.C.7d	Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available, and showing end behavior.

Enduring Understandings

1. Mathematics is a language consisting of symbols and rules.
2. The same mathematical ideas can be represented concretely or symbolically.
3. There can be different strategies to solve a problem, but some are more effective and efficient than others.

Essential Questions

- How will the student identify the standard form of a vertical or horizontal parabola?
- How will the student find the vertex, focus, axis of symmetry, directrix, and latus rectum of a parabola?
- How will the student find the x and y intercepts of a parabola?
- How will the student determine the direction of opening of a parabola?
- How will the student compare the width of a parabola to the standard graph?
- How will the student find the maximum and minimum values of parabola's?
- How will the student graph the parabola and its inverse?
- How will the student find the equation of a parabola in (h,k) form from given information?
- How will the student convert the equation of a parabola into (h,k) form by completing the square?

Knowledge and Skills

Identify the parts of a parabola: vertex, focus, axis of symmetry, directrix, latus rectum, direction of opening

Identify the width or narrowness of a parabola

Find maximum and minimum values of a parabola

Use completing the square to get a quadratic function into the standard form of a parabola

Find x and y intercepts of a parabola

Find the equation of a parabola from given information

Graph a quadratic equation

Transform a parabola to (h,k) form

Find the Axis of Symmetry of a parabola
