# 07 Topic: Irrational & Fractional Exponents Copied from: All Algebra 2, Copied on: 02/28/22 Copied from: Algebra 2A, Copied on: 02/28/22 Copied from: Algebra 2A, Copied on: 02/28/22

Content Area: Mathematics
Course(s): Algebra 2
Time Period: Semester 1
Length: 2 weeks
Status: Published

### **Standards**

MA.N-RN.A.1	Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents.
MA.N-RN.A.2	Rewrite expressions involving radicals and rational exponents using the properties of exponents.
MA.N-RN.B.3	Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational.
MA.K-12.6	Attend to precision.
MA.K-12.8	Look for and express regularity in repeated reasoning.

# **Enduring Understandings**

- 1. Mathematics is a language consisting of symbols and rules.
- 2. The same mathematical ideas can be represented concretely or symbolically.
- 3. There can be different strategies to solve a problem, but some are more effective and efficient than others.

# **Essential Questions**

How will the student perform operations with radical expressions with different indexes and expressions with fractional exponents?

Does the order of evaluating the numerator and denominator matter?

# **Knowledge and Skills**

- Simplify radical expressions
- Simplify with rational exponents
- Simplify radicals and expressions with different root indexes
- Multiply radical expressions with different root indexes
- Add and Subtract radical expressions
- Divide and rationalize with monomial and binomial denominators
- Simplify irrational expressions
- Simplify expressions with rational exponents

### **Transfer Goals**

Using mathematical reasoning and strategic thinking can allow for practical solutions of many problems.

Often unique vocabulary and implementation methods are needed to solve problems.

## Resources

- 1. McDougal/Littell Algebra & Trigonometry Structure & Method Book 2
- 2. Aufmann/Barker/Lockwood Intermediate Algebra with Applications Sixth Edition
- 3. Houghton/Mifflin/Harcourt On Core Mathematics Algebra 2
- 4. Holt Algebra 2 with Trigonometry
- 5. Larson/Boswell Big Ideas Math: Algebra 2 Texas Edition
- 6. Khan Academy
- 7. PurpleMath
- 8. KutaSoftware
- 9. CK-12

- 10. Quizlet
- 11. Albert I/O
- 12. <u>Desmos</u>
- 13. Problem Attic
