## Standards

---

|              |  |
|--------------|--|
| MA.K-12.2    | Reason abstractly and quantitatively.  |
| MA.K-12.3    | Construct viable arguments and critique the reasoning of others.   |
| MA.K-12.4    | Model with mathematics.  |
| MA.K-12.5    | Use appropriate tools strategically.   |
| MA.A-REI.A.2 | Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise. |

## Enduring Understandings

---

1. Mathematics is a language consisting of symbols and rules.
2. The same mathematical ideas can be represented concretely or symbolically.
3. There can be different strategies to solve a problem, but some are more effective and efficient than others.

## Essential Questions

---

What methods will students use to solve Fractional Equations?

How do students solve work and distance word problems?

How will students be able to identify, solve, and use literal equations?

## Knowledge and Skills

---

simplify complex rational expressions

solve fractional equations

solve literal equations

## **Transfer Goals**

---

Using mathematical reasoning and strategic thinking can allow for practical solutions of many problems.

Often unique vocabulary and implementation methods are needed to solve problems.
