Standards

MA.K-12.7	Look for and make use of structure.
MA.F-IF.C.7e	Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude.
MA.G-SRT.C.8	Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.
MA.F-TF.A.3	Use special triangles to determine geometrically the values of sine, cosine, tangent for $\pi/3$, $\pi/4$ and $\pi/6$, and use the unit circle to express the values of sine, cosines, and tangent for $\pi - x$, $\pi + x$, and $2\pi - x$ in terms of their values for x , where x is any real number.
MA.F-TF.B.5	Choose trigonometric functions to model periodic phenomena with specified amplitude, frequency, and midline.
MA.F-TF.B.7	Use inverse functions to solve trigonometric equations that arise in modeling contexts; evaluate the solutions using technology, and interpret them in terms of the context.

Enduring Understandings

- 1. Mathematics is a language consisting of symbols and rules.
- 2. The same mathematical ideas can be represented concretely or symbolically.
- 3. There can be different strategies to solve a problem, but some are more effective and efficient than others.

Essential Questions

- 1. How are triangles and trigonometric functions related?
- 2. How are trigonometric functions used to solve triangles?
- 3. Why is it important to know the relationship between a circle and a right triangle?

Knowledge and Skills

Define Trigonometric Terminology Sketch Angles with Specified Rotations Understand Co-Terminal Angles Understand Reference Angles Understand Coordinate Plane and Quadrants Understand and Use Pythagorean Theorem Understand Special Right Triangles – Derivation and Usage Understand Trigonometry Functions – Sine, Cosine, Tangent, Secant, Cosecant, and Cotangent
