

# Unit 17: Sequences & Series

Content Area: **Mathematics**  
Course(s): **PreCalc Trig H**  
Time Period: **Semester 2**  
Length: **2 weeks**  
Status: **Published**

## Standards - NJCCS/CCSS

---

CCSS.Math.Content.HSA-SSE.B.4	Derive the formula for the sum of a finite geometric series (when the common ratio is not 1), and use the formula to solve problems.
CCSS.Math.Content.HSF-BF.A.2	Write arithmetic and geometric sequences both recursively and with an explicit formula, use them to model situations, and translate between the two forms.
CCSS.Math.Content.HSF-IF.A.3	Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers.
CCSS.Math.Content.HSF-LE.A.2	Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table).

## Enduring Understandings

---

Arithmetic and geometric sequences and series are mathematical patterns that stem from practical situations.

## Essential Questions

---

What is the difference between an arithmetic sequence and a geometric sequence?

Do all infinite geometric sequences converge?

What does sigma notation represent?

How does one identify if a scenario is geometric or arithmetic?

## Knowledge and Skills

---

SWBAT evaluate an arithmetic sequence.

SWBAT apply the properties of arithmetic sequences.

SWBAT evaluate a geometric sequence.

SWBAT apply the properties of geometric sequences.

SWBAT identify which types of geometric sequences converge and what they converge to.

## **Resources**

---

Precalculus with Limits
