09. Culminating Presentations: A tale of YOUR Big Ideas!

Content Area: Science
Course(s): Human Bio A
Time Period: Semester 1
Length: 2 weeks
Status: Published

Standards

SCI.HS-LS1 From Molecules to Organisms: Structures and Processes

SCI.HS-LS3 Heredity: Inheritance and Variation of Traits

Enduring Understandings

- You can take "a lot" of information and digest it in a relatively short period of time so that it is meaningfully prepared and presented in an understandable way.
- Big Ideas can be "common language" to help others understand.
- One doesn't need to know everything about everything to learn something, develop an understanding, and present it professionally and competently.

Essential Questions

- You can take "a lot" of information and digest it in a relatively short period of time so that it is meaningfully prepared and presented in an understandable way.
- Big Ideas can be "common language" to help others understand.
- One doesn't need to know everything about everything to learn something, develop an understanding, and present it professionally and competently.

Knowledge and Skills

NGSS Science Skills/Practices:

- Asking Questions
- Developing and Using Models

- Constructing Explanations.
- Engaging in Argument from Evidence.
- Obtaining, Evaluating, and Communicating Information.

Knowledge:

• The course Big Ideas have connections to everything!
