Enduring Understandings

Students will understand the following:

How to read challenging fiction, poetry, drama, and nonfiction with attention to nuances of content and style.

How to make connections between and among ideas of multiple authors writing on related subjects.

How to craft and develop a complex thesis expressing the writer's own informed position.

How to achieve clarity and coherence through formal organization, expert use of evidence, effective transitions, and correctness at the sentence level.

Essential Questions

How can writing help readers understand a work of literature more fully?

How do we make meaningful connections between and among works of fiction, poetry, drama, and nonfiction?

How do we develop and support an interpretive position on an issue?

How do we balance the voices of other authors with our own voice?

Knowledge and Skills

Students will read and understand articles, essays, and works of fiction, poetry, and drama intended for an educated audience.

Students will use this knowledge to develop claims that respond to the ideas of others.

Students will develop their own sustained claims in dialogue with texts and independently make connections, solve problems, and convey understanding based on synthetic thinking.

Students will synthesize texts by connecting ideas from multiple texts.

Students will become proficient using the Modern Language Association documentation style in their writing.

Literary Research Paper Guidelines

Grade 11 - all levels

Assignment rationale:

The goals of this assignment are to foster inquiry, and to strengthen research, close reading, and analytical writing skills by teaching students to manage the extended task of writing a literary research paper.

The kind of research paper this assignment requires

While this paper will most often be described as an argument, it is not an argument in the sense that the student is attempting to persuade the reader to take some specific action or change a previously held point of view. Instead, this paper is more of an attempt to gain the reader's acceptance of the information and explanations the student sets out in writing.

Selecting a topic and getting started

The starting point for this paper is a student's own reading of a literary work - a short story, novel, play, or poem - from junior year English class. After selecting the literary work that will serve as a starting point, a student uses the list of topic options below to propose a focus for the paper.

Excerpt from Roberts, Edgar V. Writing About Literature, 13th ed. Upper Saddle River, Pearson, 2012.:

1. A particular work. You might treat character… or tone, ideas, structure, form, and the like. A research paper on a single work is similar to an essay on the same work, except that the research paper takes

into account more views and facts than those you are likely to develop without the research.

1. A particular author. A project might focus on an idea or some facet of style, imagery, setting, or tone of the author, tracing the origins and development of the topic through a number of different stories, poems, or plays… This type of essay is suitable for a number of shorter works, although it is also applicable for a single major work, such as a longer story, novel, or play.

1. The influence of an idea, author, philosophy, political situation, or artistic movement on specific works of an author or authors. An essay on influences can be specific and to the point… or it can be abstract and critical.

1. The origin of a particular work or type of work. Such an essay might examine an author's biography to discover the germination and development of a work…Another way of discovering origins might be to relate a work to a particular type or tradition.

(Roberts 263)

Sequence of activities:

In-class and homework activities while planning, researching, and writing this paper follow the general progression outlined below.

With ongoing instruction and individualized support, students will:

-Determine a research topic using the options above.

-Transform this topic into a set of questions to guide research.

-Find sources that will be useful in answering research questions.

-Use insights gained from source material to help refine or "educate" the research questions.

-Take notes and develop a method for organizing those notes and the sources that help answer the core

research question(s).

-Reflect on findings from primary and secondary sources.

-Develop a working thesis, and establish a line of reasoning - a sequence of supporting claims to develop the thesis.

-Draft the paper one section at a time. To do this, a student close-reads well-chosen pieces of evidence to develop each supporting claim.

-Use feedback from the teacher and from peers to revise and strengthen the focus, organization, development, and overall presentation of the paper.

-Edit writing for clarity and to be sure that sources are documented according to MLA style.

Each unit of study in English includes assessments that are used formatively as well as assessments that are used as summative, culminating experiences.

Formative assessments include low-stakes, exploratory responses written in the form of journal/learning log entries, quick writes, and free writes. Formative assessments also include announced and unannounced reading checks and exercises to determine the depth of students' understanding of key concepts. While formative assessments are often graded assessments, they are typically "lower-stakes" grades, and they help teachers and students develop an informed sense of each student's progress with the knowledge and skills targeted for a particular unit of study. The aim of such assessments and teacher feedback in response is to provide students with an accurate understanding of their performance relative to unit goals as well as actionable feedback to help them strengthen their performance.

Summative assessments include such tasks as essays, extended papers, objective and constructed response tests, Socratic seminar discussions, projects, and debates. While teachers also use these assessments formatively - by providing actionable feedback on written drafts or on Socratic seminar performance to guide student revision and improvement on subsequent tasks - summative assessments typically serve as "higher-stakes" grades.
