Each unit of study in English includes assessments that are used formatively as well as benchmark assessments that are used before planned summative, culminating experiences.

Formative assessments include low-stakes, exploratory responses written in the form of journal/learning log entries, quick writes, and free writes. Benchmark assessments also include announced and unannounced reading checks and exercises to determine the depth of students' understanding of key concepts. While formative/benchmark assessments are often graded assessments, they are typically "lower-stakes" grades, and they help teachers and students develop an informed sense of each student's progress with the knowledge and skills targeted for a particular unit of study. The aim of such assessments and teacher feedback in response is to provide students with an accurate understanding of their performance relative to unit goals as well as actionable feedback to help them strengthen their performance.

Summative assessments include such tasks as essays, extended papers, objective and constructed response tests, Socratic seminar discussions, projects, and debates. While teachers also use these assessments formatively - by providing actionable feedback on written drafts or on Socratic seminar performance to guide student revision and improvement on subsequent tasks - summative assessments typically serve as "higher-stakes" grades.
