CAEP.9.2.12.C.3 Identify transferable career skills and design alternate career plans.

Enduring Understanding

Excel is a useful tool used to automate many accounting functions.

Excel can be used to create financial systems to facilitate recording, posting and reporting.

Essential Questions

How can an automated accounting system help my business achieve accuracy and efficiency?

Why might an algorithm be a cycle instead of a linear path?

Knowledge and Skills

- Create and use Excel based general ledger
- Create and use Excel based general and special journals
- Link worksheets in a workbook to facilitate data entry
- Create functions and calculations within a spreadsheet.

Transfer Goals

Use Excel and other spreadsheet programs to create formulas that will facilitate the recording and summarizing of financial data.

Categorizing data allows you to make more meaningful observations.

Using data to back decisions allows for greater clarity and accuracy.
