Enduring Understanding

A corporation is a form of business that has many owners who have stock.

Different types of stock have different rights that are afforded its owners.

Accounting is different depending on the type of stock.

Essential Questions

What are the advantages and disadvantages of a Corporation?

How is the Issuance of Stock accounted for?

How do we use stockholders' equity ratios to evaluate performance?

Knowledge and Skills

- Identify the characteristics of a corporation
- Calculate and record sale of stock transactions at Par value
- Calculate and record sale of stock transactions for more than Par value
- Calculate and record sale of stock transactions for less than Par value
- Evaluate and record stock transactions for assets other than cash
- Students will be able to record and calculate common stock with no Par value
- Calculate and record common stock with stated value
- Calculate and record the purchase of treasury stock and evaluate the impact on stockholder equity
- Account for cash dividends, stock dividends, and stock splits
- Account for the purchase and sale of treasury stock
- Explain how equity is reported for a corporation
- Use earnings per share, rate on common stock, and P/E ratio to evaluate business performance

Transfer Goals

Consider the data available and the methods that can be used to simplify and categorize it.

Attention to detail avoids mistakes.
