

# Unit 11: Trigonometric Identities (Part 2)

Content Area: **Mathematics**  
Course(s): **PreCalc Trig H**  
Time Period: **Semester 2**  
Length: **2 weeks**  
Status: **Published**

## Standards - NJCCS/CCSS

---

CCSS.Math.Content.HSF-TF.C	Prove and apply trigonometric identities
CCSS.Math.Content.HSF-TF.C.9	Prove the addition and subtraction formulas for sine, cosine, and tangent and use them to solve problems.

## Enduring Understandings

---

Trigonometric identities are valuable in a wide variety of contexts because they allow for expressions to be represented in more convenient forms.

## Essential Questions

---

How are the sum, difference, double, and half angle formulas developed for sine, cosine, and tangent?

How are the sum, difference, double, and half angle formulas for sine, cosine, and tangent applied to evaluate expressions without a calculator?

What strategies are used when proving trigonometric identities?

## Knowledge and Skills

---

SWBAT develop and apply sum and difference formulas for sine, cosine, and tangent.

SWBAT develop and apply double angle formulas for sine, cosine, and tangent.

SWBAT develop and apply half angle formulas for sine, cosine, and tangent.

SWBAT apply sum, difference, double, and half angle formulas for sine, cosine, and tangent.

SWBAT prove trigonometric identities.

## Resources

---

## Trigonometry
