Enduring Understanding

1. Like conventional Photography Digital is about Seeing Imagery and translating it to a two-dimensional form.
2. Bright, realistic colors are commonplace, and the old unsaturated color or black and white are now special applications rather than the norm.
3. The digital darkroom is similar to traditional darkroom photography, the meaning of the photograph is paramount

Essential Questions

1. How do we use the technology of the camera to create photographic art?
2. How do we use the technology of photographic software to create photographic art?
3. How do we use the photo studio to create photographic art?
4. What role does photographic paper play in the production of photographic art?

Knowledge and Skills

- Students will be able to identify the elements of art and design to be: line, shape and form, value, color, space and texture
- Students will be able to identify the principles of design to be: balance, unity, contrast emphasis, pattern, movement and rhythm
- Students will be able to define these terms, recognize them in examples of photographic art and apply them to their own work.
- Students will be able to define the terms: harmony, contrast, balance and proportion.
- Students will be able to recognize vantage point and composition in works of art and works of photographic art.
- Students will be able to understand the nature of different focal lengths and f stop(s) and how they

effect the look of the photograph.

- Students will be able to determine which focal length and/or f-stop would be best for different types of photography.
- Students will be able to apply knowledge of focal length and f-stop to their own work.
- Students will be able to expand use of Photoshop to include use of layers and advanced tools that can adjust a digital image.

Resources

- Camera technology and advanced usage.
- Advanced use of Photoshop
